<<中国农村科技发展报告>>

书籍目录

Foreword
Review New Progress in Modern Agricultural Technology
Outline for Rural Science and Technology Development in China
World Rice Science and Technology and Food Safety——Review of the Beijing International Rice Conference
Representative Agricultural Research Work
Transgenic Plant Research and Industrialization
Development of New Type Fertilizer and Application Technology
High Efficient Water-Saving Agricultural Technology and New Product
Biological Control Technology Against Agricultural Disease and Insect Facility Agriculture and Equipment Development
Produce Deep Processing Technology
Information Technoloy and Precision Agriculture
Agricultural Disaster Prevention and Reduction Technology
Proress of Rural Science and Technology Work
Completing Framework Mpa and Precision Map for Rice (Indica Rice) Genome
Completing of Precision Sequencing of NO.4 Chromosome
Development and Extension of the Quality and High Yidding Corn Variety “ Nong Da 108 ”
Development of Cotton Insect Resistant Gene
Selection and Devlopment of High Oil Content New Soybean Varicty
Successful Development fo the Highest oil Content Rape Varicty in the World
Study and Demonstration of the New Type Heliogreenhouse Vegetable System
Technology Engineering
Plant Material Stress-Resistant Selection and Cultivation Technology in the Shelter Forest of “ Northwest China, Nothr China and Northeast china ”
Yunnan Semi-Fine Wool Sheep Development
Study on the TRurbot Artificial Aquaculture and Its Extension
Regional Distribution of Advantageous Produce
Competitive Power in Agricultural Science and Technology
Rural Science and Technology Capacity Construction
Hot Issues of Social Concern
Appendix
Statistical Data
Postscript
Tables in the Text
Figures in the Text
