

图书基本信息

书名：<<MESE Windows 2000网络结构管理部分>>

13位ISBN编号：97871111100638

10位ISBN编号：71111100638

出版时间：2002-4

出版时间：机械工业出版社

作者：RORY MCCA W

页数：360

字数：472

内容概要

This book is your passport to the Implementing and Administering a Microsoft Windows 2000 Network Infrastructure exam (70-216), Which is one of the four core Windows 2000 MCSE exams required in your pursuit of the coveted Microsoft Windows 2000 MCSE certification. The Network Infrastructure exam tests your skills and knowledge of some of the most complex network infrastructure issues involved in the implementation and administration of a Windows 2000 Network. You'll learn about networking services like DHCP DNS, and WINS. Then we'll turn our attention to security components like certificate services, PKI, and IPSec. Lastly, we'll visit the remote-access infrastructure implemented through the Routing and Remote Access Server service, including IP routing and Internet sharing features like Internet Connection Sharing and Network Address Translation, just to name a few of the major points. The Implementing and Administering a Windows 2000 Network Infrastructure exam is generally said to be the toughest of the four Windows 2000 MCSE core exams, but with your passport, you'll be well prepared for this exam and can let it act as a stepping stone to your certification.

书籍目录

Check-In

I Windows 2000 Network Services

1 DHCP Network Infrastructure

Objective 1.01

Install,Configure,and Troubleshoot DHCP

Objective 1.02

Install the DHCP Server Service

Objective 1.03

Create and Manage DHCP Scopes,
Super Scopes,and Multicast Scopes

Objective 1.04

Authorize a DHCP Server in Active Directory

Objective 1.05

Configure DHCP for DNS Integration

Objective 1.06

Manage and Monitor DHCP

CHECKPOINT

2 DNS Network Infrastructure

Objective 2.01

Install,Configure,and Troubleshoot DNS

Objective 2.02

Install the DNS Server Service

Objective 2.03

Configure Zones

Objective 2.04

Manually Create DNS Resource Records

Objective 2.05

Configure Zones for Dynamic Updates

Objective 2.06

Implement a Delegated Zone for DNS

Objective 2.07

Configure a Root Name Server

Objective 2.09

Manage and Monitor DNS

Objective 2.10

Test the DNS Server Service

Objective 2.11

Configure a DNS Client

CHECKPOINT

3 WINS Network Infrastructure

Objective 3.01

Install,Configure,and Troubleshoot WINS

Objective 3.02

Configure NetBIOS Name Resolution

Objective 3.03

Configure WINS Replication

Objective 3.04

Manage and Monitor WINS

CHECKPOINT

II Windows 2000 PKI and IPSec

Network Infrastructure

4 Certificate Services and Public Key Infrastructure

Objective 4.01

Install and Configure Certificate Authority

Objective 4.02

Issue and Revoke Certificates

Objective 4.03

Removing the Encrypting File System(EFS)

Recovery Keys

CHECKPOINT

5 Network Protocol Configuration

Objective 5.01

Install,Configure,and Troubleshoot

Network Protocols

Objective 5.02

Install and Configure TCP/IP

Objective 5.03

Configure TCP/IP Packet Filters

Objective 5.04

Install the NWLink Protocol

Objective 5.05

Configure Network Bindings

Objective 5.06

Manage and Monitor Network Traffic

Objective 5.07

Configure and Troubleshoot Network

Protocol Security

Objective 5.08

Configure and Troubleshoot IPSec

Objective 5.09

Enable IPSec

Objective 5.10

Configure IPSec for Transport Mode

Objective 5.11

Configure IPSec for Tunnel Mode

Objective 5.12

Customize IPSec Policies and Rules

Objective 5.13

Manage and Monitor IPSec

CHECKPOINT

III Windows 2000 Routing and Remote Access Infrastructure

6 Remote Access Infrastructure

Objective 6.01
Configure and Troubleshoot
Remote Access
Objective 6.02
Configure Inbound Connections
Objective 6.03
Configure a Virtual Private Network(VPN)
Objective 6.04
Configure Routing and Remote Access
for DHCP Integration
Objective 6.05
Configure Remote Access Security
Objective 6.06
Create a Remote Access Policy
Objective 6.07
Configure a Remote Access Profile
Objective 6.08
Configure Multilink Connections
Objective 6.09
Configure Authentication Protocols
Objective 6.10
Configure Encryption Protocols
Objective 6.11
Manage and Monitor Remote Access
CHECKPOINT
7 IP Roution Network Infrastructure
Objective 7.01
Install,Configure,and Troubleshoot
IP Routing Protocols
Objective 7.02
Manage and Monitor IP
Routing Protocols
Objective 7.03
Manage and Monitor Internal Routing
Objective 7.04
Manage and Monitor Border Routing
Objective 7.05
Update a Windows 2000-Based Routing Table
by Means of Static Routes
Objective 7.06
Implement Demand-Dial Routing
Objective 7.07
Manage and Monitor IP Routing
CHECKPOINT
8 Network Address Translation
Objective 8.01
Install Internet Connection Sharing

Objective 8.02

Install Network Address Translation

Objective 8.03

Configure NAT Properties

Objective 8.04

Configure NAT Interfaces

CHECKPOINT

Appendix A:About the CD-ROM

Appendix B:Career Flight Path
