

<<蓝牙揭密(影印本)>>

图书基本信息

书名：<<蓝牙揭密(影印本)>>

13位ISBN编号：9787115091406

10位ISBN编号：7115091404

出版时间：2001-4-1

出版时间：人民邮电出版社

作者：Nathan.J.Muller

页数：396

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<蓝牙揭密(影印本)>>

内容概要

本书介绍了蓝芽技术的相关原理、标准、协议、最新应用等新技术。是国际上蓝芽技术的畅销图书。

<<蓝牙揭密(影印本)>>

书籍目录

1. The Case for Bluetooth 1	* What About Infrared? 2	* Infrared and Bluetooth? 3
* Speed Differential 4	* Wireless to Wireline 4	* Dialup to the Internet 5
bout Wireless LANs? 6	* HomeRF Networks 8	* Bluetooth Advantage 13
Bluetooth 14	- What's With the Name? 15	* Bluetooth Technology 16
Links 17	- Ad Hoc Networking 17	- Voice over Bluetooth 18
Bluetooth 19	- Radio Link 21	- Interference 21
Area Networks 22	* Bluetooth Topology 23	* Security 25
Bluetooth? 26	- Presentations 26	- Card Scanning 27
- Synchronizing Data 27	- Remote Synchronization 28	- Printing 28
Systems 29	- Communicator Platforms 29	- Electronic Books 30
- Home Entertainment 32	- Payment Systems 32	- Scanners 33
Enforcement 34	- Mobile E-Commerce 34	* Java and Bluetooth 37
Bluetooth 38	* Other Connectivity Solutions 40	- JetSend 40
- Global 3G Wireless Framework 42	* Problems with Bluetooth 44	* Bluetooth Qualification
Program 45	* Market for Bluetooth 45	2. Basic Concepts
49	* Serial versus Parallel 50	- Parallel Transmission 51
* Asynchronous versus Synchronous 53	- Serial Transmission 51	- Synchronous 57
* Spread Spectrum 60	- Asynchronous 54	- Frequency
Hopping 65	- Spreading 62	* Time Division Duplexing 68
Physical Links 74	* Circuit and Packer Switching 66	* Peeking into Packets 75
* Bluetooth Packets 77	- SCO Links 74	- Header 79
Logical Channels 82	- ACL Links 75	- Payload 81
Service Discovery 86	* Client-Server Architecture 83	- Architectural Model 83
* What Are Protocols 90	* Summary 88	3. Bluetooth Protocol Architecture 89
- Presentation Layer 94	* Open Systems Interconnection 91	- Application Layer 92
Layer 97	- Session Layer 95	- Transport Layer 96
* Bluetooth Core Protocols 103	- Data-Link Layer 98	- Network
104	- Physical Layer 99	* Bluetooth Protocol Stack 101
105	- Baseband 104	- Link Manager Protocol(LMP)
Protocols 107	- Logical Link Control and Adaptation Protocol 105	- Service Discovery Protocol(SDP)
- OBEX Protocol 110	* Cable Replacement Protocols 105	- Telephony Control
Environment(WAE) 113	* Adopted Protocols 107	- TCP/UDP/IP 108
Summary 120	- PPP 107	- WAP Applications
Response Messages 127	- Wireless Application Protocol(WAP) 111	* Usage Models and Profiles 118
129	- Content Formats 116	* Types of PDUs 123
Encryption 131	* Authentication 127	* Pairing 128
Accuracy Information Request 134	* Changing the Current Link Key 130	* Changing the Link Key
Switching of Master-Slave Role 136	* Clock Offset Request 133	- Changing a Temporary Link Key 130
137	* LMP Version 134	* Slot Offset Information 133
Quality-Driven Change of Data Rate 141	* Name Request 137	* Supported Features 136
* Control of Multi-Slot Packets 144	* Park Mode 139	* Detach 137
* Connection Establishment 146	* Quality of Service(QoS) 142	* Hold Mode
Summary 148	* Paging Scheme 145	* Channel
Basic Operation 152	* Test Modes 147	* SCO Links 143
* State Machine 155	5. Logical Link Control 149	* Link Supervision 146
	- Channel Identifiers 153	* Error Handling 147
	- Events 157	* L2CAP Functions 151
	- Actions 161	- Segmentation and Reassembly 154
		- Channel Operational States 163

<<蓝牙揭密(影印本)>>

- Mapping Events to Actions 164
- Connection-Oriented Channel 168
  - Packet Structure 170
- 173
  - Packet Structure 173
- Service Primitives 176
  - Event Indication 176
- 177
  - Configure 177
- Write 177
  - Read 178
- Group Add Member 178
  - Ping 179
- Group Remove Member 178
  - Get Info 179
- Group Create 178
  - Group Close 178
- Group Membership 179
  - Enable
- Disable Connectionless Traffic 179
- Connect 176
  - Connect Response
- Disconnect 177
- Configuration Response 177
- Configuration Process 175
- Configuration Parameter Options
- Signaling 170
- Connectionless Data Channel 169
- Signaling Commands 171
- Options 174
- Data Packet Format 168
- Common Parameters 184
- Establishment Procedures 188
- Power Mode and Link Loss Handling 193
- RS-232
- Idle Mode Procedures 186
- Serial Port Profile 190
- Application-Level Procedures 191
- L2CAP Interoperability Requirements 194
- SDP Interoperability
- Link Manager Interoperability Requirements 195
- Client and Server Roles 197
- Pairing 199
- Service
- Service Discovery
- Service Discovery 202
- SDP Transactions and L2CAP Connections
- Message Sequence 202
- Configuration Options 204
- SDP Transactions and L2CAP Connections
- Signaling 203
- Link Manager 206
  - Link Control 208
- Profile(GOEP) 210
  - Profile Stack 211
  - Server and Client 211
  - Profile Basics 212
  - Features 213
  - OBEX Operations 213
  - Summary 214
- Bluetooth Profiles for Usage Models 217
  - Message Summary 223
  - Call Failure 223
  - Cordless Telephony Profile 225
  - Typical Call Scenarios 227
  - Features 229
- Device Roles 226
- Terminal-to-Gateway Connection 230
- Terminal-to-Terminal Connection 231
- Call
- Control 232
  - Group Management 234
  - Periodic Key Update 235
- Inter-Piconet Capability 236
  - Service Discovery Procedures 236
  - LMP Procedures 237
  - Link Control Features 238
  - GAP Compliance 239
  - Headset Profile 241
- Profile Restrictions 243
  - Basic Operation 243
  - Features 244
  - Link Control
- Features 246
  - GAP Compliance 247
  - Dialup Networking Profile 248
  - Profile
- Restrictions 250
  - Basic Operation 250
  - Services 251
  - Gateway Commands 251
  - Audio Feedback 253
  - Service Discovery Procedures 254
  - Link Control
- Features 254
  - GAP Compliance 254
  - Fax Profile 256
  - Profile Restrictions 257
  - Basic Operation 258
  - Services 259
  - Gateway Commands 259
  - Audio
- Feedback 260
  - Service Discovery Procedures 260
  - Link Control Features 260
  - GAP Compliance 260
  - LAN Access Profile 261
  - Profile Restrictions 263
  - Basic Operation 264
  - Security 265
  - GAP Compliance 265
  - Service Discovery
- Procedures 266
  - Link Control 267
  - Management Entity Procedures 267
  - File
- Transfer Profile 268
  - Basic Operation 270
  - Functions 270
  - Features 271
  - OBEX Operations 272
  - Service Discovery Procedures 273
  - Object Push Profile 273
  - Functions 275
  - Basic Operation 276
  - Features 277
  - Content Formats
- 277
  - OBEX Operations 278
  - Service Discovery Procedures 278
- Synchronization Profile 279
  - Basic Operation 281
  - Features 283
  - OBEX
- Operations 284
  - Service Discovery Procedures 284
  - Summary 286
- Bluetooth Security 289
  - Security Modes 290
  - Link-level Security 291
  - A Matter
- of Trust 292
  - Flexible Access 293
  - Implementation 293
  - Architecture Overview
- 294
  - Security Level of Services 296
  - Connection Setup 296
  - Authentication on

<<蓝牙揭密(影印本)>>

Baseband Link Setup 297	- Protocol Stack Handling 298	- Registration Procedures 299
- External Key Management 301	- Access Control Procedures 301	* Connectionless
L2CAP 301	* Security Manager 301	* Interface to L2CAP 305
Multiplexing Protocols 306	* Interface to ESCE 306	* Registration Procedures 306
Interface to HCI/Link Manager 307	* Summary 308	9. Bluetooth in the Global
Scheme of 3G Wireless 309	* The IMT-2000 Vision 311	* Spanning the Generations 311
* Current 2G Networks 314	- Time Division Multiple Access 314	- Code Division
Multiple Access 316	- CDMA versus TDMA 317	* Global 3G
Initiative 326	- Standards Development 326	- Goals of IMT-2000 328
Mobile Telecommunications System 329	* U.S. Participation in 3G 334	- CDMA Proposals
334	- TDMA Proposal 338	* Role of Bluetooth 339
Appendix A 343	* Contributors to the Bluetooth Specification 343	* Summary 341
347	* Terms and Definitions 347	Appendix B
Index 381	Appendix C 371	* Acronyms 371
