<<医学心理学>>

前言

医学心理学是研究心理现象与疾病和健康相互关系的一门学科，是正在发展中的交叉学科，已成为现代医学教育中非常重要的课程。

随着当前我国高等医学教育国际化进程的不断加快，越来越多的医学留学生来我国高等医学院校学习，这些都对医学教育中运用英语教学提出了更高的要求；同时，教育部对本科教育的双语教学要求也越来越高。

但是，目前专门针对医学留学生以及本科教育双语教学的医学心理学教材还非常缺乏。

为了加快与国际水平接轨，并满足医学院校对双语教学的要求，我们编写了这本英文版的《医学心理学》，以满足各医学院校教学的需要。

根据普通高等教育“十一五”国家级规划教材及卫生部“十一五”规划教材的要求，结合我国医学教育的特点及国际著名心理学教材的特点，对教材的结构和内容进行了精心的组织，并邀请了国内教学经验丰富、有英语国家学习经历的医学心理学专家编写了这本教材，同时邀请了外国专家进行审校，以保证本教材的质量。

全书内容可分为三个部分。

第一部分绪论，主要介绍了心理学的发展历史、心理学的分支学科、生物-心理-社会医学模式以及心理学研究方法；第二部分主要介绍了普通心理学和发展心理学的基本知识，包括感觉和知觉、记忆、学习、动机和情感、个性以及意识、睡眠和梦；第三部分主要介绍了和临床有关的应用心理学知识，包括心理测量、健康心理学、异常心理、心身疾病、心理治疗、心理咨询以及医患关系等。

本教材既保留了心理学的基本知识框架，又增加了许多当今心理学进展的知识，并在内容上与国际上的临床心理学和心身医学接轨，适用于医学留学生、研究生及七年制医学教育的医学心理学英语教学；同时也适合本科教育的医学心理学双语教学。

参加本教材编写的老师们为本教材的编写付出了很大努力，反复推敲，多次精心修改，并对稿件进行了互审、互校。

虽然如此，由于缺乏编写英文版专业教材的经验，难免会出现各种缺陷或错误，我们诚挚地希望使用本教材的老师和同学们提出宝贵意见。

内容概要

《医学心理学（英文版）》根据普通高等教育“十一五”国家级规划教材及卫生部“十一五”规划教材的要求，结合我国医学教育的特点及国际著名心理学教材的特点，对教材的结构和内容进行了精心的组织，并邀请了国内教学经验丰富、有英语国家学习经历的医学心理学专家编写了《医学心理学（英文版）》，同时邀请了外国专家进行审校，以保证本教材的质量。

书籍目录

Chapter I Introduction to Psychology 1. Introduction : 1.1 What is Psychology ?
 1.2 Professions of Psychology 1.3 The Goals of Psychology 2. The Historical Origins of Psychology 2.1 Historical Development of Psychology 2.2 Timeline of Important Events in the History of Psychology 3. Contemporary Psychological Perspectives 3.1 Biological Perspective 3.2 Psychoanalytic Perspective 3.3 Behavioral Perspective 3.4 Humanistic Perspective 3.5 Cognitive Perspective 4. The Major Subfields of Psychology 4.1 Experimental Psychology 4.2 Applied Psychology 5. The Biopsychosocial Model 6. Research Methods in Psychology 6.1 The Research Process 6.2 Research Biases 6.3 Common Methods for Reduction in Bias 6.4 Ethical Considerations in Research

Chapter 2 Major Topics in General Psychology

Section 1 Sensation and Perception 1. Introduction 1.1 Why Do We Study Sensation and Perception ?
 1.2 Difference between Sensation and Perception 2. Sensation 2.1 The Assessment of Sense 2.2 Parts and Functions of the Basic Senses 3. Perception 3.1 Selectivity of Perception 3.2 Organization of Perception 3.3 Perceptual Constancy 3.4 Space and Depth Perception 3.5 Perceptual Illusions 3.6 Theories of Perceptual Development

Section 2 Memory 1. How We Study Memory ?
 2. Memory Processes 2.1 Encoding 2.2 Storage 2.3 Retrieval 3. Stages of Memory 3.1 Sensory Memory 3.2 Short-Term Memory (STM) 3.3 Long-Term Memory (LTM) 4. Types of Memory 4.1 Implicit Memory 4.2 Explicit Memory 4.3 Differences between Explicit and Implicit Memory 5. Forgetting 5.1 Ebbinghaus Forgetting Curve 5.2 Causes of Forgetting 5.3 Amnesia

Section 3 Learning 1. Introduction to Learning 1.1 What is Learning ?
 1.2 Types of Learning 2. Classical Conditioning 2.1 Pavlov ' s Experiments 2.2 Principles of Classical Conditioning 2.3 Application of Classical Conditioning 3. Operant Conditioning 3.1 What is the Operant Conditioning ?
 3.2 Law of Effect 3.3 Principles in Operant Conditioning 3.4 Schedules of Reinforcement 3.5 Comparison of Classical and Operant Conditioning 3.6 Applications of Operant Conditioning 4. Observational Learning 4.1 Bandura ' s Experiment 4.2 Steps to Successful Modeling 4.3 Possible Mechanism of Observational Learning

Section 4 Motivation 1. Intrinsic and Extrinsic Motivations 2. Theoretical Perspectives on Motivation 2.1 Instinct Theory 2.2 Drive Reduction Theory 2.3 Optimal Arousal Theory 2.4 Incentive Theory 2.5 Cognitive Theory 2.6 Maslow's Hierarchy of Needs 3. Applying the Different Theories to Motivation 4. Dealing with Multiple Motives

Section 5 Emotion 1. Physiological Aspect of Emotion 1.1 Physiological Changes of Emotion 1.2 The Neuropsychology of Emotion 2. Subjective Experience 2.1 Types of Emotion 2.2 Functions of Emotion 3. Emotional Expression 3.1 Facial Expressions 3.2 Culture and Emotion Display Rules 3.3 Gender and Emotional Expression 4. Theoretical Perspectives on Emotion 4.1 James-Lange Theory 4.2 Cannon-Bard Theory 4.3 Cognitive Perspectives on Emotion 4.4 The Opponent-Process Theory

Section 6 Personality 1. Introduction to personality 2. Approaches to Personality 2.1 The Psychoanalytic Approach 2.2 The Trait Approach 2.3 The Behavioral and Social Learning Approach 2.4 The Humanistic Approach 2.5 The Cognitive Approach 2.6 The Biological Approach 3. Personality Assessment 3.1 Observational Methods 3.2 Personality Inventories

Section 7 Consciousness, Sleeping and Dreaming 1. Consciousness 1.1 What is Consciousness ?
 1.2 Functions of Consciousness 1.3 States of Consciousness 1.4 Levels of Consciousness 2. Sleeping and Dreaming 2.1 Functions of Sleep 2.2 Sleep Patterns 2.3 Sleep Disorders 2.4 Dreaming 3. Altering Consciousness 3.1 Hypnosis 3.2 Meditation 3.3 Altered States with Drugs

Chapter 3 Psychological Development 1. Introduction to Developmental Psychology 2. Theories of Developmental Psychology 3. Cognitive, Emotional, and Social Development 3.1 Infancy and Childhood 3.2 Adolescence 3.3 Adulthood

Chapter 4 Psychological Test 1. Introduction to Psychological Assessment 1.1 Types of Tests 1.2 Uses of Tests 1.3 A Brief History : Test is the Need of Society 2. Requirements for a Good Test 2.1 Item Selection 2.2 Standardization 2.3 Reliability 2.4 Validity 3. Tests of Intellectual Ability 3.1 Binet ' s Method 3.2 Stanford Binet Intelligence Scale 3.3 Wechsler Intelligence Scales.....

Chapter 5 Health Psychology Chapter 6 Psychological Disorders Chapter 7 Psychosomatic Disorders Chapter 8 Psychotherapy Chapter 9 Psychological Counseling Chapter 10 Doctor-Patient Relationship

章节摘录

Some psychologists suggested that understanding the function of the mind is more important than analyzing the structures of the mind or mental processes. In 1890, the American psychologist William James (1842-1910) published his classic textbook, *The Principles of Psychology*. His idea is considered as the basis of a new school of psychology called functionalism. During his time, the famous British biologist Charles Darwin proposed that evolution could be explained through natural selection. A biological function that fits to the environment will be maintained, in other words, the development of the functions of species depends on the environment. James quite agreed on Darwin's theory, and believed that analyzing the elements of the mind was less important than understanding the fluid mental functions. William James was interested in the questions such as, "what are the functions or purposes of various behaviors and mental processes ?"
