<<针灸治疗带状疱疹>>

内容概要

《针灸治疗带状疱疹》内容简介：This book is part of an extensive clinical series for Chinese clinical practitioners. It includes detailed Chinese medical differentiation methods according to the traditional theories of TCM, and also a full description of the Western medical etiology and pathology. The clinician is provided with appropriate treatment methods including: acupuncture, moxibustion, cupping, tuina and Chinese medicinal formulas as well as detailed clinical case studies and scientific research data.

Acupuncture can treat herpes zoster by eliminating blisters and erythema and by preventing neuralgia. With acupuncture and moxibustion, the course of treatment can be shortened with no adverse side effects.
