<<国家重点建设工程>>

内容概要

On July 1 , 2006 , trains departed from Beijing , Shanghai , Guangzhou and Chengdu on their first journey to Lhasa. The enclosed streamlined trains sped at more than 100km / hour on the 5.000-m-high Qinghai-Tibet Plateau. The vast Hoh Xil Grassland flashed across the train windows , with occasional Tibetan antelope or Chiru nibbling at the verdant grass and Tibetan wild ass running after the trains. Far-away snow-capped mountains radiated under the golden Sun.

<<国家重点建设工程>>
