

图书基本信息

书名：<<2009年北京价值工程与价值管理国际会议论文集>>

13位ISBN编号：9787121095948

10位ISBN编号：7121095947

出版时间：2009-10

出版时间：电子工业出版社

作者：邱菀华 编

页数：654

字数：1075000

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

内容概要

本论文集收录了国内外价值工程研究与应用领域的最新、最前沿的发展研究成果，并包括机械设计与制造、工程建设、流程改造等领域的价值管理方面的研究成果共100余篇，对关注提高客户价值、降低成本的读者以及价值工程与项目管理等领域的研究者与实践者具有重要的参考意义和价值。

书籍目录

Think Function-VE Success Stories
Value Engineering for Construction Projects in UAE
Adding Value By Improving The Performance of Facilities
Application of Risk Analysis for Value Engineering in Dam Engineering
Interrelationship Teardown in Value Engineering
Creativity for Value Management Interactive Impact Analysis for Both Tourism-Planning parties
The research of venture return model in venture Capital projects
The application of membrane technology based on recycling economy in constructing water-saving society
The Application Research of Value Engineering (VE) in Geotechnical Engineering
Fiscal and Taxation Policy Research on promoting Energy-Saving and Emissions Reduction
Application of M-IP in Benefit Evaluation on the Equipment in Whole-life Cycle
Application of Value Engineering in Space Engineering Project
Analysis for the Value of Time of the Commodity Transport Using VE Method
A Study of Perceived Quality and Price: Customer Value-Based Pricing Strategy
Application of Value Engineering in Optimizing Mine Production System Capacity
Creative Industries-The Effective Path of the Resource-conserving Society
The Optimization of Construction Agencies Based on Value Engineering
Study on the Design and Operation of Motivation and Restriction Mechanisms of Resource-conserving Enterprise
Analysis Of The Impact Of GDP, Foreign Investment In Fixed Assets And Exchange Rate On China's Export
Discussion on Value Management of Government Investment Projects
Difficult Choices: the Predicament of Complex Agricultural Technology
An analysis of the concept and application of VM
Use of Logistics Regression Model in Credit Evaluation for Mobile Subscribers
Support Vector Regression with Mixtures of Kernels Incorporating a PSO Algorithm in Weapon System Cost Prediction
The Researches on Realization Routs of Core Technology Independent Innovation in Industrial Clusters
The Business Model: An Integrative Framework for Value Net/web-based Value Creation System
Application Study of Complex Value Engineering in Investment Decision for the Engineering Project
An Exploration of G-reen Evaluation on Supplier Based on Multiobjection Fuzzy Model
A Study on Ecological Behavior of Enterprises Based on Value Engineering
Application of Partial Least-square Regression to Engine Maintenance Project Cost Forecasting
The value analysis of faculty on assessment of disciplines
The Relationship Research on Agricultural Financial Expenditure and Agricultural Development-Based on 1990-2006 Data
Based on the Value Engineering Theory
VE-based Marketing Channels Decision Making
Improve the Knowledge Management Capabilities of Chinese Futures Companies
Selection of Gas Pipeline System Schemes Based on Value Engineering
Decision-making of Product Platform Innovation Based on Value Engineering
Feasibility Study of the Real Estate Development Project Based on Application of the Value Engineering
The Measurement on Constructing a Resource-Saving and Environment-Friendly Society
Project risk modeling and simulation based on DSM
Model of Knowledge Management Based on Virtual Enterprise
VM Application in Petrochemical Industry
Energy Saving
Remote Working: the New Way of Emission Reduction
Reflections on Optimal Allocation of Transport Corridor Resources from the Perspective of Network
The Application of Value Engineering in the Design of Specialist Hospital Advertising
Application of Value Analysis in Confirming Equipment Initial Spares Varieties
Research on the Identification of Financial Control Risk for the Value Promotion of the Aviation Research Project
An Assessment Model of Community Harmonious Development Based On TOPSIS Method
Study on Investment Project Appraisal Based on Recycling Economy.....
