前言

You can learn Chinese easily. I would like to send this message to the world through this book. In this book modern Chinese is broken down into 5 basic sentence structures. Additionally, 6 types of modifiers and 5 types of function words which are most common and useful in Chinese expressions are picked out and added to the sentence structures. All of them are in one chart. With this chart, to a large extent, you will be able to express your ideas in Chinese. The book includes a detailed explanation for each element of the chart. Sentence structures, sentence modifiers, sentence function words are supported with many standard examples, progressing from the simple to the more complex. Throughout the book, Chinese is compared with English to give you an excellent understanding of the structure of the Chinese language.
