<<论语言和语言学>>

内容概要

This third volume in the Collected Works of M.A.K.Halliday series includes papers that explore different aspects of language from a systemic functional perspective.The papers are organized into three sections:the place of linguistics as a discipline;linguistics and language; and language as social semiotic.In addition,there is a new work from Professor Halliday,entitled'On the"architecture"of human language,'in which he focuses on the assumptions or working hypotheses that enabled him to explore important questions about this massive semiotic power called'language'.作者简介：　　Professor M.A.K.Halliay(b.1925)was Foundation Professor of Linguistics at the University of Sydney until his retirement and has taught as a Visiting Professor around the world.As a self-styled'generalist'hehas published in many branches of linguistics.
