

<<ATM网互通技术--英文>>

图书基本信息

书名：<<ATM网互通技术--英文>>

13位ISBN编号：9787302028215

10位ISBN编号：7302028214

出版时间：1998-01

出版时间：清华大学出版社

作者：布莱克(美)

页数：128

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

## <<ATM网互通技术--英文>>

### 内容概要

ATM网络与其他网络的互通技术是当前B-ISDN研究领域中的一个热点，有效的网络互通将使现有应用平滑地过渡到宽带应用。

该书是一本介绍ATM网络互通的专著，重点讨论了ATM与帧中继，ATM与局域网以及ATM与基于IP协议的因特网、企业网之间的互通。

其主要内容包括：(1)互通帧的封装原则和地址映射操作(RFC1483，RFC577，RFC1490)；(2)ATM与帧中继之间的互通操作；(3)网络互通和业务互通的概念及原理；(4)局域网仿真(LANE)及其操作协议；(5)NHRP协议；(6)ATM网上的多协议(MPOA)技术等。

作者Uyless Black是世界上非常著名的计算机网络及数据通信领域的专家，在公用网和专用网方面具有丰富的实践阅历。

本书适合于大专院校电信与计算机专业的研究生及高年级本科生作为参考书，也可供从事电信和计算机网络工作的广大科技人员阅读。

<<ATM网互通技术--英文>>

书籍目录

Preface xv	CHAPTER 1 Introduction	Reasons for Internetworking 1	Reasons for Internetworking and Interworking 2
for Internetworking with ATM 1	Terms and Definitions 2	Interworking and	Addresses and Virtual Circuit Identifiers 3
Identifiers 3	L_2 and L_3 Protocol Data Units (PDUs) 3	Specific Terms for the Virtual Circuit ID 4	ATM Internetworking Examples 4
Correlating Addresses and Virtual Circuit IDs 4	Routing and Switching 4	The ATM and Frame Relay Headers 6	Comparison of ATM and IP 9
Comparison of ATM and Frame Relay 6	Comparison of ATM and LAN Technologies 9	Summary 13	CHAPTER 2
Comparison of ATM and LAN Technologies 9	Conventions for ATM Interfaces and Data Units 11	Encapsulation Concepts 14	Service
Conventions for ATM Interfaces and Data Units 11	Encapsulation and Address Mapping Operations	Etherype (Type) 18	Subnetwork
Encapsulation and Address Mapping Operations	Access Points (SAPS) 16	ISO/IEC TR 9577 (Network Level Protocol Identifier [NLPID]) 19	Pons/PSAPS 21
Access Points (SAPS) 16	LLC and LSAPS 17	IP Protocol ID 21	Suppon for
Access Protocol (SNAP) 18	Examples of Joint Use of NLPID and SNAP 20	Example of Encapsulation Operations 24	Encapsulation Rules for Frame Relay (RFC 1490) 28
Examples of Joint Use of NLPID and SNAP 20	Putting It All Together 22	Encapsulation Rules for ATM (RFC 1483) 29	Options in RFC 1483 30
Putting It All Together 22	Layer 2 and 3 Protocois 26	Resolution Protocol (ARP) 31	The ARP Protocol Data Units (PDUs) 33
Layer 2 and 3 Protocois 26	Encapsulation Rules for ATM (RFC 1483) 29	ARP 34	Classical IP and ARP Over ATM (RFC 1577) 36
Encapsulation Rules for ATM (RFC 1483) 29	Resolution Protocol (ARP) 31	Rules for Address Resolution 38	Operations at the ATMAARP Server and Client 40
Resolution Protocol (ARP) 31	ARP 34	Operations at the Server 40	Operations at the ATMARP Client Site 41
ARP 34	Classical IP and ARP Over ATM (RFC 1577) 36	Inverse ATMARP Packet Formats 44	ATMARP and INATMARP Packet Encapsulation 44
Classical IP and ARP Over ATM (RFC 1577) 36	Rules for Address Resolution 38	Multicast Address Resolution Server (MARS) 46	Pros and Cons of MARS 48
Rules for Address Resolution 38	Operations at the Server 40	48	Summary
Operations at the Server 40	Operations at the ATMARP Client Site 41	CHAPTER 3 ATM/Frame Relay Interworking Operations 49	ATM/Frame Relay
Operations at the ATMARP Client Site 41	Inverse ATMARP Packet Formats 44	Interworking Models 49	Protocol Encapsulat;on and
Inverse ATMARP Packet Formats 44	Multicast Address Resolution Server (MARS) 46	Protocol Mapping 50	Guides for the User InteHace
Multicast Address Resolution Server (MARS) 46	48	51	One Scenario for ATM
48	CHAPTER 3 ATM/Frame Relay Interworking Operations 49	Primitive Operations 52	Summary 58
CHAPTER 3 ATM/Frame Relay Interworking Operations 49	Interworking Models 49	Frame Relay Interworking 55	Guidance from RFC 1483 56
Interworking Models 49	Interworking Definitions 50	CHAPTER 4 DXI and FUNI 59	Why DXI and FUNI were Developed 59
Interworking Definitions 50	Network and Service Interworking 51	Topologies 60	DXI and FUNI
Network and Service Interworking 51	Parameter Primitives 54	1A and 1B 62	Example of Modes
Parameter Primitives 54	One Scenario for ATM	Comparisons of DXI and FUNI 67	Summary 69
One Scenario for ATM	Summary 58	CHAPTER 5 Network Interworking 70	Network
Summary 58	Guidance from RFC 1483 56	Interworking Scenarios 71	Variable Length PDU
Guidance from RFC 1483 56	CHAPTER 4 DXI and FUNI 59	FormaUing and Delimiting 76	Connection Multiplexing 76
CHAPTER 4 DXI and FUNI 59	Why DXI and FUNI were Developed 59	Discard Eligibility and Cell Loss Mapping 79	PVC Status
Why DXI and FUNI were Developed 59	DXI and FUNI	Management 84	Definitions
DXI and FUNI	Example of Modes	of Service Interworking 87	Service interworking
Example of Modes	Summary 69	Functions 90	Discard Eligibility and Cell Loss
Summary 69	Network	Priority Mapping 93	Mapping the DLCI 94
Network	Variable Length PDU	Management Procedures 94	PVC
Variable Length PDU	Connection Multiplexing 76	94	Bridged PDUs
Connection Multiplexing 76	PVC Status	Routed OSI PDUs 98	ARP Procedures 100
PVC Status	Definitions	ARP Message Formats 101	Frame Relay Quality of
Definitions	Service interworking	Service 104	Service 104
Service interworking	Discard Eligibility and Cell Loss	Connection Policing and TraHic Shaping 106	FR-ATM Quality of Service 104
Discard Eligibility and Cell Loss	Mapping the DLCI 94	LAN Emulation 108	CHAPTER 7 Introduction to
Mapping the DLCI 94	PVC	(LANE) 109	Purpose of LAN Emulation
PVC	Bridged PDUs	Suppon of Key LAN Operations 110	LAN Emulation Components 110
Bridged PDUs	ARP Procedures 100		
ARP Procedures 100	Frame Relay Quality of		
Frame Relay Quality of	Service 104		
Service 104	FR-ATM Quality of Service 104		
FR-ATM Quality of Service 104	CHAPTER 7 Introduction to		
CHAPTER 7 Introduction to	Purpose of LAN Emulation		
Purpose of LAN Emulation	LAN Emulation Components 110		
LAN Emulation Components 110			

<<ATM网互通技术--英文>>

Registrations 112	ARP Operations 113	Connection Setup 114	Virtual
Channels 115	LAN Use of Primitives (Service Definitions) 116	The LAN Protocol Model	
118	Principal LUNI Functions 120	Control and Data Channel Connection 121	
Control Channel Connections 121	Data Channel Connections 122	The Initialization	
Function 124	Address Resolution Operations 126	Connection Establishment Procedures	
127	The SETUP Message 129	Rules for Sending User Traffic 131	Spanning
Tree Operations 131	Summary 132	CHAPTER 8 Service Specification and Protocol Data	
Units	(PDUs) 133	Basic Concepts 133	LE-ULP Service Specifications 138
LE-AAL Service Specifications 137	LE-Connection Management Service Specifications 137	Add and Drop Party Procedure 142	
Parameters for the Connection Service 140	LE-Layer Management Service Specifications 142	Data Frames 146	Type/Length (TL)
Operations 147	Summary 150	CHAPTER 9 Configuration, Registration, and ARP	
Procedures and LNNI 151	The Configure Operation 151	The Join Operation 154	
The Registration Operation 158	Registration Frame Format 159	The Lane Address	
Resolution Protocol 160	The ARP Frames 160	LE Client Use of ARP 160	LE
Server Use of ARP 161	Example of ARP Operations 161	ARP Frame Format 163	
LE_NARP Frame Format 164	LE_Topology_Request Frame Format 165	LAN	
Emulation Network-Network Interface (LNNI) 165	Summary 166	CHAPTER 10 Next Hop	
Resolution Protocol (NHRP) 167	Purpose of NHRP 167	Modeling the NBMA Network	
168	NHRP Operations 169	Examples of NBMA Operations 171	Authoritative
and Nonauthoritative Replies 172	Restrictions on the Messages 173	The NHRP Messages 173	Station Configurations
179	A More Detailed Example 173	Summary 179	Pros and Cons
of NHRP 176	Other NHRP Operations 179	Purpose of MPOA 180	CHAPTER 11
Multiprotocol over ATM (MPOA) 180	Intra-Subnet and Inter-Subnet Operations 181	Advantages of L_3	
Operations 180	MPOA Requirements 185	Virtual Routing 184	
MPOA Cache 185	MPOA Clients and Servers 186	Ingress Cache 185	Egress
MPOA Information Flows 189	Major MPOA Operations 191	The Use of Tags 189	
MPOA Operations 191	MPOA Host-to-MPOA Host 192	Examples of	
194	Edge Device-to-Edge Device 194	Edge Device-to-MPOA Host	
The MPOA Protocol Data Units (PDUS) Formats 198	Roles of MPS and MPC in More Detail 194	Format and Syntax for the MPOA Messages	
199	Other MPOA Operations 200	Appendix A Basics of Internetworking 202	
Appendix B Addressing Conventions 215	Appendix C Lane Parameters 221	Index 233	
Abbreviations 225	Other References 228
