

## <<代数拓扑>>

### 图书基本信息

书名：<<代数拓扑>>

13位ISBN编号：9787302105886

10位ISBN编号：730210588X

出版时间：2005-3

出版时间：清华大学

作者：哈彻Hatcher

页数：544

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

## &lt;&lt;代数拓扑&gt;&gt;

## 内容概要

This geometrically flavored introduction to algebraic topology has the dual goals of serving as a textbook for a standard graduate-level course and as a background reference for many additional topics that do not usually fit into such a course. The broad coverage includes both the homological and homotopical sides of the subject. Care has been taken to present a readable, self-contained exposition, with many examples and exercises, aimed at the student or the researcher from another area of mathematics seeing the subject for the first time. The four main chapters present the basic core material of algebraic topology: fundamental groups, homology, cohomology, and higher homotopy groups. Each chapter concludes with a generous selection of optional topics, accounting for nearly half the book altogether.

<<代数拓扑>>

书籍目录

Preface Chapter 0 Some Underlying Geometric Notions Chapter 1 The Fundamental Group 1.1 Basic  
Constructions 1.2 Van Kampen's Theorem 1.3 Coverng Spaces Additional Topics Chapter 2 Homology 2.1  
Simplicial and Singular Homology 2.2 Computaiions and Applicaltions 2.3 The Formal Viewpoint Additional  
Topics Chapter 3 Cohomology 3.1 Cohomology Groups 3.2 Cup Product 3.3 Poincare Duality Additional  
Topics Chapter 4 Homotopy Theory 4.1 Homotopy Groups 4.2 Elementary Methods of Calculation 4.3  
Connections with Cohomology Additional Topics Appendix Bibliography Index
