

<<概率统计高级教程卷1>>

图书基本信息

书名：<<概率统计高级教程卷1>>

13位ISBN编号：9787302167266

10位ISBN编号：7302167265

出版时间：2008-4

出版时间：HUNG T.NGUYEN、TONGHUI WANG 清华大学出版社 (2008-04出版)

作者：(美) 源亨 (美) 王通会 著

页数：309

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<概率统计高级教程卷1>>

内容概要

This is an update Text book for beginning graduate students in Mathematics , Probability and Statistics , Engineering , Computer Sciences , Mathematical Economics. It distinguishes from all existing texts on the subject from its pedagogical spirit , namely , motivations before mathematics : mathematics tools are only introduced when needed and motivated. All theoretical results are proved in a friendly fashion. Teaching the students , not only the concepts and possible applications , but also guiding the students with proof techniques. This series will help students to learn with full understanding and appreciation of the subject. It will provide interested students with solid background for research.

<<概率统计高级教程卷1>>

作者简介

作者：(美国)HUNG T.NGUYEN TONGHUI WANG

书籍目录

Preface
 1 Models for Random Experiments
 1.1 Games of Chance
 1.2 Experiments with Infinitely Many Outcomes
 1.3 Structure and Properties of Probability Spaces
 1.4 Conditioning and Independence
 1.5 Exercises
 2 Models for Laws of Random Phenomena
 2.1 Discrete Sample Spaces
 2.2 The Sample Space R^d
 2.3 The Sample Space R^d
 2.4 The Sample Space of Closed Sets of R^d
 2.5 Exercises
 3 Models for Populations
 3.1 Random Elements
 3.2 Distributions of Random Elements
 3.3 Some Descriptive Quantities of Random Variables/Integration
 3.3.1 The concept of expectation of random variables
 3.3.2 Properties of expectation
 3.3.3 Computations of expectation
 3.3.4 The Choquet integral and random sets
 3.4 Independence and Conditional Distributions
 3.5 Exercises
 4 Some Distribution Theory
 4.1 The Method of Transformations
 4.2 The Method of Convolution
 4.3 Generating Functions
 4.4 Characteristic Functions
 4.5 Exercises
 5 Convergence Concepts
 5.1 Convergence of Random Elements
 5.2 Convergence of Moments
 5.3 Convergence of Distributions
 5.4 Convergence of Probability Measures
 5.5 Exercises
 6 Some Limit Theorems For Large Sample Statistics
 6.1 Laws of Large Numbers
 6.1.1 Independent random variables
 6.1.2 Independent and identically distributed random variables
 6.1.3 Some examples
 6.1.4 Uniform laws of large numbers
 6.2 Central Limit Theorem
 6.2.1 Independent and identically distributed random variables
 6.2.2 Independent random variables
 6.3 Large deviations
 6.3.1 Some motivations
 6.3.2 Formulation of large deviations principles
 6.3.3 Large deviations techniques
 6.4 Exercises
 7 Conditional Expectation and Martingales
 7.1 The Discrete Case
 7.2 The General Case
 7.3 Properties of Conditional Expectation
 7.4 Martingales
 7.5 Exercises
 Bibliography
 Index
