China Radio & TV Universities CRTVUs through more than 20 years of operation have accumulated a wealth of practical experience in teaching & research management & technology The experience has been used in research ot distance education principles to enrich distance education theory. The Distance Education Academic Committee of Higher Education Institutrons ot China Association for Educational Technology has now selected a series of case studies and research findings in distance education with Chinese characteristics and will recommend them to our counterparts who have supported or are conducting research on distance education. This may also be considered as a contribution ot CRTVUs to the international distance education research. We wish to take this opportunity to thank all of the distance education experts from abroad who have heiped us in facititating the development ot GRTVUs.

Globalisation and Strategic Thinking on CRTVUs' DevelopmentThe Cross-culture Teaching and Learning Cooperation on Open and Distance Education in the Era of NetworkBe Active in Practice and Exploration to Construct a New Mode for Distance Open EducationOn the Spread and Demonstration of Humanistic Spirit in Distance Teaching and ManagementOpen and Distance Education: First Choice for Educational Development in Remote RegionsThe Basic Model of Higher Education Through Distance Learning in Underdeveloped Area of ChinaStudent-centered Study-A Brand-new Learning Mode of Distance EducationInvestigation and Reflection on Cultivation of Learning CapabilityInvestjgation.
