## 章节摘录

书摘Task 3 Group Discussion

1. What will you take into account when choosing your partner? When we are in love with someone, we seldom think about anything else except our own feeling. But if we are to marry someone, we would usually think over what qualities we hope our partners have. A sense of responsibility tops the list of the qualities that I want my future partner to have, for it is essential to the maintenance of a stable marriage. Second come honesty and sense of humor, which are of the same significance, since honesty is the basis for trust, while a sense of humor can make everyday life more enjoyable, ease the tension in our life and help us gain relaxation from the tense competition outside in society. After these qualities, I believe potential power and intelligence are also important, especially the former. As for some other qualities, such as income, age, height, etc., they do not mean so much as the previous ones, but it will be better if he/she has a steady income, and his/her age and height can match mine. Obviously, it is hard to find a person with all these desired qualities. What we should keep in mind is that we can never attach too much importance to the trivial and material ones and neglect the major ones.

2. Views on divorce When people get married, nobody would expect their marriage to end up in a divorce. But if the marriage does not have a solid foundation, for example, in the case of arranged marriage or material-oriented marriage, it is very likely for the couple to split up in the end. And sometimes both sides are expecting too much of their marriage but neither of them wants to take any responsibility, then very possibly the two will turn their backs to each other some day. Some say divorce is the tragedy of a failed marriage, but this is not necessarily the case. If the couple extremely cannot forbear to live together and always quarrel or stay in a "cold war", they can choose to separate, because such a situation brings forth lots of problems, unhappy life, ineffective work, bad memory for children, etc.. If so, divorce offers them an opportunity to end their misery and turn a new leaf in their life. But just as everything has two sides, to get a divorce is to some extent to replace one social problem with other problems. For instance, it results in broken families and may cause misery to both the children and the divorced parents. The parents' divorce is very terrible to their children. The young will feel lonely, having an incomplete life. They will be in lack of warm love from their parents. All this might make the children become a social problem -- drug addicts, gamblers, gangsters, etc.. In addition, it might cause a mental or psychological illness. Divorce also has negative effects on the partners. It can make them unhappy and poorer. They'll be easy to get angry. More seriously, it may lead to life failure in weak people, because after they separate to live alone, each person's burden will increase. The situation will be even worse if he/she has to bring up the children. Therefore, when their marriage is in trouble, the couple should first try to find out the problem and solve it. They have to be understanding and tolerant. Only when they have no other choice, should they carefully consider choosing divorce to be their last resort.

3. Dink family or happy family The great changes taking place in China in the past decades have led to great changes in the Chinese family structure. Together with the implementation of population control policy, these changes result in the disintegration of large extended families, and bring about more and more smaller families such as stem families and nuclear families. In the recent decade, the rapid economic growth and huge influx of western ideas have witnessed the emergence of another type of family -- Dink family, i. e. family with double income but no kids. Personally, I think Dink family is just a matter of choice. For some couples, they choose not to have kids because they want to devote their efforts to the larger community instead of their own family, just like the way Premier Zhou did in his lifetime. While others do so because they do not believe they can be qualified parents. They feel they could have other alternatives since they are not good at parenthood. And this at least is better than when they find they are incapable of bring up their kids. Of course there are also such people who consider freedom, privacy and leisure more important than becoming parents. They choose to have no children simply because they do not want to be bound to the heavy burden of childcare and the resulting housework. But anyway, it is not so serious a problem as falling away from biological or social norms. It is only people's different choice of their own lifestyle. However, though the problem of overpopulation is quite serious in China, Dink family is not advisable. One of the main reasons is that the problem of the aging population in our country is also very pressing now. Moreover, most of the couples who choose to live

in Dink families are well-educated. This will result in a possible decrease in the overall level of intelligence of the future generations. What's more, many Dink families tend to be less stable than families with kids. Therefore, in present China, one-child family may still be a better choice for most people and the country as well.....

## 媒体关注与评论

序我国改革开放20余年来，社会经济不断取得新的发展，人们的学习理念亦随之发生深刻的变化。

其中对教育改革的反思和创新，表现在探索改变传统外语教学模式努力之中尤为显著。九十年代中期，在上海市紧缺人才培训工程架构下所创建的“外语口译资格证书考试项目”应该可被视作上海高校外语教育和考试领域中的一个重大举措。

几年来，在英语口译资格证书考试与培训活动中，由于定位得当，教材和考试组织合理，有关方面领导和专家的理念创新，业已吸引越来越多的具有较强英语功底的英语人才通过培训和考试，“盘活知识存量”，使自己的英语才能得以在应用中得到“变现”。

数以万计的英语人才参加高、中级口译资格证书考试的热烈场面；和数以百计的高校英语教师参与培训和考试阅卷与口试等工作充分显示了全社会为改变传统外语学习不能“学以致用”的弊病的巨大努力，也证明了这一考试项目的强大生命力。

考试委员会和专家组，在总结经验，不断完善思路指引下，于2001年已经完成了高级口译培训教材的修订工作。

新面世的第二版的培训指定教材以其权威性、科学性和应用性的特点已受到各方面的好评。目前，新版的中级口译培训教材业已进入修改重订程序，于2002年内将以全新的面貌由上海外语教育出版社出版发行。

为配合英语高级口译资格证书考试的培训工作，东华大学外语学院的杨永平老师等根据多年培训教学的经验和对考试大纲的认识和理解编写了同指定教材相匹配的一套五本高级口译辅导学习教材。作为本项目考试委员会、专家组及指定教材编委会的成员，我个人认为，整套辅导教材对于教学培训过程具有积极作用。

尤其通过对这本口语辅导教程的审校修改，我觉得它可以为师生在教学过程提供辅助和延展的支持功能。

根据本人长期从事英语口语教学的经验和实践的体会而言，有以下几点重要的建议愿同广大的教师和学员分享。

第一，口语是外语学习和应用的重要基础。我们把外语学习的重点从知识的积累转向实践应用的过程中，特别是按口译人才的要求来提高外语水平，充分重视口语的作用是一个关键的要素。

第二，口语学习和考试的要求应置重点于流畅的表达。而这一能力的培养主要靠实践的训练。其中要克服的除了学习的惰性以外，更重要的是“怕错、怕羞”的心理弱点。

第三，英语表达效果的提高，应该充分重视口语化句型的应用、具有逻辑性的、合理的篇章的结构、讲话者的思路及英语文化背景三大要素。并把它们有机地结合在有一定长度的表述的过程中。

第四，英语口语能力是一个综合性的因素，除了知识性的因素和熟练程度因素以外，在不同场景中的心理和行为反应及自控能力也不能忽视此即所谓“言行举止是一个整体”的基本道理。我们的英语口语教学要做好这几点，必须同时重视听力、阅读、笔译和口译的同步提高，以取得“融会贯通”之效果。

其中，学员的主体地位、教师的组织教学、教材的科学合理和训练的“熟能生巧”是至关重要的。我国的“人世”将加快我们社会经济国际化的进程，学好英语改善沟通效果业已成为当务之急。在这本口语辅导教程行将付梓之际，应编纂者之诚邀为之作序，无非希望广大参加英语高级口译资格证书考试培训的教师和学员能从中得到裨益。
