<<大学英语4级高分作文点睛>>

前言

根据《大学英语教学大纲》对写作的要求、《大学英语四级考试大纲》关于写作的规定及从1987年至今20多年40多套大学英语四级考试真题作文的分析，四级考试的短文写作几乎一成不变地遵循以下9个方面的考点，各有3个层次，故而把它称之为“三点式作文法”（3+3Approach）：本书按以下3大模块对四级考试短文写作作出多方位立体处理，笔者把它称之为“三位一体作文法”。

笔者多年从事大学英语教学、大学英语四、六级强化教学、测试命题研究、测试解题策略研究，著有相关书籍50余本。

本书应各地强化班学员要求，结合笔者多年四、六级作文强化教学体会，将多年讲稿经过内容上的增删整理，优化成册。

旨在帮助立志写好英语4级考试短文、考好英语四级考试的学生提供一种可操作的多元写作操练模式，以在自己所期望的短期内突破英语四级考试作文大关，提高基础写作能力。

最后需要提醒的是，尽管本书提供了一些行之有效的“章法”，但短文写作毕竟是实践性很强的一种能力，因此考生在学习本书所介绍的方法的同时，必须经常动动笔，以能做到熟能生巧。

感谢美籍专家Linda Steven女士和澳籍专家John Hleasman对书中短文做了大量润色，使每篇短文在语言上都显得非常地道。

书籍目录

评分标准基本要求三段式短文的特点与展开段落的展开、衔接与终结三句式段落展开法段落中的三个细节的选取篇章结构与展开模式命题形式及写作构思真题作文演示背诵填空模块话题背诵模块

章节摘录

It is well known that crime causes great harm to individuals and society. In a society where the rate of crime is high, people can no longer go on with their routine life in peace and security. They are constantly worried by the dangers of murder, robbery, rape and other kinds of crimes. As a result, the whole of society is thrown into total disorder. So, in order to lead a normal life in a peaceful society, it becomes necessary to fight against crime. Governments have taken many measures to keep crimes down by using more policemen and making more laws. But this alone cannot win the war. People should learn to protect themselves and always be on guard. They should also take the trouble to educate their children so as to keep them on the right track. Moreover, as many crimes are caused by such social problems as racial discrimination, unemployment and the great gap between the rich and the poor, the government should take measures to address these problems and create a society of freedom, equality and justice.

85. Go Sightseeing More and more Chinese people are fond of travelling. Tour ads fill newspapers and magazines. Tourist agencies are found on many streets. On weekends, trains, buses and planes are packed with the excited sightseers. Now some people start to travel abroad for pleasure. Tourism benefits US in many ways. First, it is an important source of national revenue. That's why it is called "smokeless industry". Second, it offers relief. Career people are tired of pressures produced by the quickening pace of modern life. By seeing the beautiful landscape of the country home and abroad, they get relaxed and widen their horizon of knowledge. Third, travelling offers challenge and opportunities of cultivating good character, such as independence, courage and strong-mindedness. Some things are not worthy. Security is the major concern for every tourist. Then we must have a careful budget before our trip. Of course we should be kind to the environment where we should leave nothing but our footprint.

86. Stop Smoking Smoking is harmful, as is proven by scientific research. However, there is still a great increase in the number of people who take up smoking. Medical science has now proved that smoking can cause lung cancer and other diseases. And it also increases the chances of having a heart attack. Smoking, therefore, is a definite threat to our health. Giving up smoking is not easy. Many life-long smokers are never able to quit it completely. Those who try to give up smoking often experience depression, severe headaches and sometimes gain a lot of weight as they turn to food as a substitute. Some heavy smokers make up their minds to quit many times but every time they slip back into the old habit. In order to protect non-smokers from the harm of smoke and prevent them from becoming smokers, measures should be taken to educate the public about the dangers of smoking. And cigarette companies should not be allowed to advertise their products on television or radio, in newspapers or magazines. And again, the smokers should refrain from smoking in public places especially where there are non-smokers, especially women and children.

87. Saving Energy at Home It was once believed that there were no limits to the energy needed. People assume it their right to heat a house without caring a second about how much energy is thus needed. Nowadays, people begin to associate an ideal home with modern electrical appliances. This ideal, however, can turn out to be a nightmare if careful attention is not given to using energy wisely. Having a home that uses too much energy can be a financial drain for the owner and, in the long run, for the country. Many measures can be taken to save energy. Here are some suggestions. Make sure the lights are turned off when you leave the room. Use electricity-saving lights instead of ordinary ones. Be economical in using water. Save the used water for flushing the toilet. Open the windows to let in sufficient fresh cool air instead of using air-conditioner, and put more clothes on instead of using the electrical heater to keep warm. Get up early at sunrise to do the work you want to instead of staying up late at night under the electric light. And above all, make sure that you do your job at home with the least possible amount of energy involved. Owning a home today carries the responsibility to reduce the amount of energy required. By paying attention to the energy-saving methods within your reach, homeowners can save money for today and natural resources for tomorrow.
