<<HSE警示录>>

内容概要

In early 2009, CNODC/CNPCI launched a Safety Moment Campaign for purpose of facilitating the share of safety knowledge and experiences among all the staff and contractors and cultivating a positive learning culture. As an initiative of this campaign, from March 2009, HSE Department of CNODC/CNPCI started to issue HSE Alert every week based on the accident and near miss reports from our companies and contractors. These Alerts received positive feedback from both line management and HSE advisors and focal points, who used them to correct their management weaknesses and train their colleagues and contractors. Meanwhile, we did witness a significant improvement of 2009 safety performance from that of 2008, which we believe partly owes to our joint efforts in promoting lessons learning and lateral application of recommendations.
