

## <<微分拓扑学>>

### 图书基本信息

书名 : <<微分拓扑学>>

13位ISBN编号 : 9787506200639

10位ISBN编号 : 7506200635

出版时间 : 2000-12

出版时间 : 北京世图

作者 : Morris W.Hirsch

页数 : 224

版权说明 : 本站所提供之下载的PDF图书仅提供预览和简介,请支持正版图书。

## &lt;&lt;微分拓扑学&gt;&gt;

## 内容概要

This book presents some of the basic topological ideas used in studying differentiable manifolds and maps. Mathematical prerequisites have been kept to a minimum; the standard course in analysis and general topology is adequate preparation. An appendix briefly summarizes some of the background material. In order to emphasize the geometrical and intuitive aspects of differential topology, I have avoided the use of algebraic topology, except in a few isolated places that can easily be skipped. For the same reason I make no use of differential forms or tensors.

### 书籍目录

Intro  
Chapter 1: Manifolds and Maps 0. Submanifolds of  $R^n$  k 1. Differential Structures 2. Differentiable Maps and the Tangent Bundle 3. Embeddings and Immersions 4. Manifolds with Boundary 5. A Convention  
Chapter 2: Function Spaces 1. The Weak and Strong Topologies on  $C^r(M,N)$  2. Approximations 3. Approximations on -Manifolds and Manifold Pairs 4. Jets and the Baire Property 5. Analytic Approximations  
Chapter 3: Transversality 1. The Morse-Sard Theorem 2. Transversality  
Chapter 4: Vector Bundles and Tubular Neighborhoods 1. Vector Bundles 2. Constructions with Vector Bundles 3. The Classification of Vector Bundles 4. Oriented Vector Bundles 5. Tubular Neighborhoods 6. Collars and Tubular Neighborhoods of Neat Submanifolds 7. Analytic Differential Structures  
Chapter 5: Degrees, Intersection Numbers, and the Euler Characteristic 1. Degrees of Maps 2. Intersection Numbers and the Euler Characteristic 3. Historical Remarks  
Chapter 6: Morse Theory 1. Morse Functions 2. Differential Equations and Regular Level Surfaces 3. Passing Critical Levels and Attaching Cells 4. CW-Complexes  
Chapter 7: Cobordism 1. Cobordism and Transversality 2. The Thom Homomorphism  
Chapter 8: Isotopy 1. Extending Isotopies 2. Gluing Manifolds Together 3. Isotopies of Disks  
Chapter 9: Surfaces 1. Models of Surfaces 2. Characterization of the Disk 3. The Classification of Compact Surfaces  
Bibliography  
Appendix  
Index
