

<<椭圆曲线的算术理论>>

图书基本信息

书名：<<椭圆曲线的算术理论>>

13位ISBN编号：9787506201353

10位ISBN编号：7506201356

出版时间：1999-11

出版时间：世界图书出版公司

作者：J.H.Silverman

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<椭圆曲线的算术理论>>

内容概要

The preface to a textbook frequently contains the author's justification for offering the public "another book" on the given subject. For our chosen topic, the arithmetic of elliptic curves, there is little need for such an apologia. Considering the vast amount of research currently being done in this area, the paucity of introductory texts is somewhat surprising. Parts of the theory are contained in various books of Lang (especially [La 3] and [La 5]); and there are books of Koblitz ([Ko]) and Robert ([Rob], now out of print) which concentrate mostly on the analytic and modular theory. In addition, survey articles have been written by Cassels ([Ca 7], really a short book) and Tate ([Ta 5], which is beautifully written, but includes no proofs). Thus the author hopes that this volume will fill a real need, both for the serious student who wishes to learn the basic facts about the arithmetic of elliptic curves; and for the research mathematician who needs a reference source for those same basic facts.

本书为英文版。
