

<<基于广义线性模型的多元统计建模>>

图书基本信息

书名 : <<基于广义线性模型的多元统计建模>>

13位ISBN编号 : 9787506238243

10位ISBN编号 : 7506238241

出版时间 : 1998-8

出版时间 : 北京世界图书出版公司

作者 : L.Fahrmeir,

页数 : 425

版权说明 : 本站所提供之下载的PDF图书仅提供预览和简介,请支持正版图书。

<<基于广义线性模型的多元统计建模>>

内容概要

本书主要讨论广义线性模型在单变量及多变量回归分析中的应用。

书中通过生物学、经济学和社会学等方面多达60余个应用实例，对近年来广义线性模型新的科研成果作了系统介绍，内容新颖，实用性强。

书籍目录

Preface
List of Examples
List of Figures
List of Tables
1 Introduction
 1.1 Outline and examples
 1.2 Remarks on notation
 1.3 Further reading
2 Modelling and analysis of cross-sectional data: a review of univariate generalized linear models
 2.1 Univariate generalized linear models
 2.2 Likelihood inference
 2.3 Some extensions
 2.4 Further developments
3 Models for multcategorical responses:multivariate extensions of generalized linear models
 3.1 Multicategorical response models
 3.2 Models for nominal responses
 3.3 Models for ordinal responses
 3.4 Statistical inference
 3.5 Multivariate models for correlated responses
4 Selecting and checking models
 4.1 Variable selection
 4.2 Diagnostics
 4.3 General tests for misspecification
5 Semi-and nonparametric approaches to regression analysis
 5.1 Smoothing techniques for continuous responses
 5.2 Kernel smoothing with multcategorical response
 5.3 Spline smoothing in generalixed lineal models
6 Fixed parameter models for time series and longitudinal data
 6.1 Time series
 6.2 Longitudinal data
7 Random effects models
 7.1 Linear random effects models for normal data ...
...
8 State space models
9 Survival models
Appendix A
Appendix B Software for fitting generalized linear models
