

<<二阶抛物微分方程>>

图书基本信息

书名：<<二阶抛物微分方程>>

13位ISBN编号：9787506259606

10位ISBN编号：7506259605

出版时间：2003-9

出版公司：世界图书出版公司

作者：G.M.Lieberman

页数：439

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<二阶抛物微分方程>>

内容概要

二阶抛物微分方程，ISBN：9787506259606，作者：G.M.Lieberman

<<二阶抛物物微分方程>>

书籍目录

Preface Chapter . Introduction 1 Outline of this book 2 Further Remarks 3 Notation Chapter . Maximum Principles 1 The Weak maximum Principles 2 The strong maximum principle 3 A priori estimates Notes Exercises Chapter . Introduction to the Theory of weak Solutions 1 The theory of weak derivatives 2 The method of continuity 3 Problems in small balls 4 Global existence and the Peron process Notes Exercises Chapter . Holder Estimates 1 Holder conbtinuity 2 Campanato spaces 3 Interior estimates 4 Estimates near a flat boundary 5 Regularized distance 6 Intermediate Schauder Estimates 7 Curved boundaries and nonzero boundary data 8 A special mixed problem Notes Exercises Chapter . Existence, Uniqueness, and Regularity of Solutions 1 Uniqueness of Solutions 2 The Cauchy-Dirichlet problem with bounded coefficients 3 The Cquchy-Dirichlet problem with unbounded coefficients 4 The obliquederivative problem Notes Exercises Chapter . Further Theory of Weak Solutions..... Chapter . Strong Solutions Chapter . Fixed Point Theorems and Their Chapter . Comparison and Maximum Principles Chapter Boundary Gradient Extimates Chapter . Global and Local Gradient Bounds Chapter XII. Holder Gradient Extimates and Existence Theorems Chapter XIII. The Oblique Derivative Problem for Quasilinear Parabolic Equations Chapter XIV. Fully Nonlinear Equations . Chapter XV Fully Nonlinear Equations .References Index
