

## <<椭圆函数>>

### 图书基本信息

书名 : <<椭圆函数>>

13位ISBN编号 : 9787506265508

10位ISBN编号 : 7506265508

出版时间 : 2003-11

出版时间 : 北京世界图书出版公司

作者 : S.Lang

页数 : 326

版权说明 : 本站所提供之下载的PDF图书仅提供预览和简介,请支持正版图书。

## &lt;&lt;椭圆函数&gt;&gt;

## 内容概要

Elliptic functions parametrize elliptic curves, and the intermingling of the analytic and algebraic-arithmetic theory has been at the center of mathematics since the early part of the nineteenth century. Some new techniques and outlooks have recently appeared on these old subjects, continuing in the tradition of Kronecker, Weber, Fricke, Hasse, Deuring. Shimura's book Introduction to the arithmetic theory of automorphic functions is a splendid modern reference, which I found very helpful myself to learn some aspects of elliptic curves. It emphasizes the direction of the Hasse-Weil zeta function, Hecke operators, and the generalizations due to him to the higher dimensional case (abelian varieties, curves of higher genus coming from an arithmetic group operating on the upper half plane, bounded symmetric domains with a discrete arithmetic group whose quotient is algebraic). I refer the interested reader to his book and the bibliography therein.

## 书籍目录

PART ONE GENERAL THEORY	Chapter 1 Elliptic Functions	1 The Jacobi-Liouville Theorems	2 The Weierstrass Function	3 The Addition Theorem	4 Isomorphism Classes of Elliptic Curves	5
Endomorphisms and Automorphisms	Chapter 2 Homomorphisms	1 Points of Finite Order	2			
Isogenies	Chapter 3 The Modular Function	1 The Modular Group	2			
Automorphic Functions of Degree 2k	3 The Modular Function	Chapter 4 Fourier Expansions	1			
Expansion for $G_k, c_2, c_3, c_4$	2 Expansion for the Weierstrass Function	3 Bernoulli Numbers				
Chapter 5 The Modular Equation	1 Integral Matrices with Positive Determinant	2 The Modular Equation				
Equation	Chapter 6 Higher Levels	1 Congruence Subgroups	2 The Field of Modular Functions Over $\mathbb{C}$			
Field of Modular Functions Over $\mathbb{C}$	3 The Field of Modular Functions Over $\mathbb{Q}$	4 Subfields of the Modular Function Field				
Chapter 7 Automorphisms of the Modular Function Field	1 Rational Adeles of $GL_2(\mathbb{Q})$	1 Rational Adeles of the Modular Function Field	3 The Shimura Exact Sequence			
2 Operation of the Rational Adeles on the Modular Function Field	2 The Shimura Exact Sequence					
PART TWO COMPLEX MULTIPLICATION						
ELLIPTIC CURVES WITH SINGULARITIES	Chapter 8 Results from Algebraic Number Theory					
1 Lattices in Quadratic Fields	2 Completions	3 The Decomposition Group and Frobenius				
Automorphism	4 Summary of Class Field Theory	Chapter 9 Reduction of Elliptic Curves	1			
Non-degenerate Reduction, General Case	2 Reduction of Homomorphisms	3 Coverings of Level N	4			
Reduction of Differential Forms	Chapter 10 Complex Multiplication	1 Generation of Class Fields, Deuring's Approach				
2 Idelic Formulation for Arbitrary Lattices	3 Generation of Class Fields by Singular Values of Modular Functions	Appendix A Relation of Kronecker	Chapter 11			
4 The Frobenius Endomorphism	1 Relation Between Generic and Special Extensions	2 Application to Shimura's Reciprocity Law				
Chapter 12 The Function (at)/(t)	1 Behavior Under the Artin Automorphism	2 Prime Factorization of its Values	3 Analytic Proof for the Congruence Relation of Chapter 13			
The I-adic and p-adic Representations of Deuring	1 The I-adic Spaces	2 Representations in Characteristic p	3 Representations and Isogenies	4 Reduction of the Ring of Endomorphisms	5 The Deuring Lifting Theorem	Chapter 14 Ihara's Theory
Chapter 15 Special Situations	1. Deuring Representatives	2 The Generic Situation	3			
PART THREE ELLIPTIC CURVES WITH NON-INTEGRAL INVARIANT	Chapter 15 The Tate Parametrization	1 Elliptic Curves with Non-integral Invariants	2 Elliptic Curves Over a Complete Local Ring	Chapter 16 The Isogeny Theorems	1 The Galois p-adic Representations	2 Results of Kummer Theory
Chapter 17 Division Points Over Number Fields	3 The Local Isogeny Theorems	4 Supersingular Reduction	5 The Global Isogeny Theorems	Chapter 18 Product Expansions	1 Theorem of Shafarevich	2 The Irreducibility Theorem
1 Ac	2 Examples	3 The Function $K_s(x)$	4 The Kronecker First Limit Formula	1 The Sigma and Zeta Function	2 The Poisson Summation Formula	3 The Skew Symmetric Pairing
Relation with L-series	3 The Function $K_s(x)$	4 The Kronecker First Limit Formula	5 The Kronecker Second Limit Formula	2 A Normalization and the q-product for the a-function	2 Examples	2 A Normalization and the q-product for the a-function
2 The Frobenius Determinant	3 Application to the L-series	Chapter 20 The Kronecker Limit Formulas	1 The Poisson Summation Formula	3 q-expansions Again	3 The Function $K_s(x)$	3 q-expansions Again
3 Application to the L-series	Chapter 21 The First Limit Formula and L-series	1 The Klein Forms	2 The Poisson Summation Formula	4 The q-product for a	4 The Kronecker First Limit Formula	4 The q-product for a
Chapter 22 The Second Limit Formula and L-series	1 Gauss Sums	2 The Siegel Functions	3 The Function $K_s(x)$	5 The Eta Function of Dedekind	1 The Klein Forms	5 The Eta Function of Dedekind
1 Gauss Sums	2 An Expression for the L-series APPENDICES ELLIPTIC CURVES IN CHARACTERISTIC p	3 Special Values of the Siegel Functions	Chapter 20 The Kronecker Limit Formulas	6 Modular Functions of Level 2	2 The Siegel Functions	6 Modular Functions of Level 2
2 An Expression for the L-series APPENDICES ELLIPTIC CURVES IN CHARACTERISTIC p	Appendix C1 Algebraic Formulas in Arbitrary Characteristic BY CJ.C TATE	Chapter 20 The Kronecker Limit Formulas	1 The Poisson Summation Formula	Chapter 19 The Siegel Functions and Klein Forms	3 Special Values of the Siegel Functions	Chapter 19 The Siegel Functions and Klein Forms
1 Generalized Weierstrass Form	Appendix 2 Canonical Forms	Chapter 21 The First Limit Formula and L-series	2 Examples	1 The Klein Forms	Chapter 20 The Kronecker Limit Formulas	1 The Klein Forms
2 Canonical Forms	3 Expansion Near O; The Formal Group	1 Gauss Sums	3 The Function $K_s(x)$	2 The Siegel Functions	2 The Siegel Functions	2 The Siegel Functions
3 Expansion Near O; The Formal Group	Appendix 2 The Trace of Frobenius and the Differential of First Kind	1 Gauss Sums	4 The Kronecker First Limit Formula	3 Special Values of the Siegel Functions	3 Special Values of the Siegel Functions	3 Special Values of the Siegel Functions
Appendix 2 The Trace of Frobenius and the Differential of First Kind	1 The Trace of Frobenius	2 An Expression for the L-series APPENDICES ELLIPTIC CURVES IN CHARACTERISTIC p	5 The Kronecker Second Limit Formula	Chapter 20 The Kronecker Limit Formulas	Chapter 20 The Kronecker Limit Formulas	Chapter 20 The Kronecker Limit Formulas
1 The Trace of Frobenius	2 Duality	Appendix 2 The Trace of Frobenius and the Differential of First Kind	1 The Poisson Summation Formula	1 The Klein Forms	1 The Klein Forms	1 The Klein Forms
2 Duality	3 The Tate Trace	Appendix 3 The Tate Trace	2 Examples	2 The Siegel Functions	2 The Siegel Functions	2 The Siegel Functions
3 The Tate Trace	4 The Cartier Operator	3 The Function $K_s(x)$	3 The Function $K_s(x)$	3 Special Values of the Siegel Functions	3 Special Values of the Siegel Functions	3 Special Values of the Siegel Functions
4 The Cartier Operator	5 The Hasse Invariant	4 The Kronecker First Limit Formula	4 The Kronecker First Limit Formula	4 The Kronecker Second Limit Formula	4 The Kronecker Second Limit Formula	4 The Kronecker Second Limit Formula
5 The Hasse Invariant	Bibliography	5 The Kronecker Second Limit Formula	5 The Kronecker Second Limit Formula	5 The Kronecker Second Limit Formula	5 The Kronecker Second Limit Formula	5 The Kronecker Second Limit Formula
Bibliography	Index	5 The Kronecker Second Limit Formula	5 The Kronecker Second Limit Formula	5 The Kronecker Second Limit Formula	5 The Kronecker Second Limit Formula	5 The Kronecker Second Limit Formula
