

<<量子力学专论>>

图书基本信息

书名：<<量子力学专论>>

13位ISBN编号：9787506266109

10位ISBN编号：7506266105

出版时间：2004-4

出版时间：世界图书出版公司(此信息作废)

作者：Walter Greiner

页数：378

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

## <<量子力学专论>>

### 内容概要

- 《量子力学专论》主要内容有：
1. Quantum Theory of Free Electromagnetic Fields。
  2. Interaction of Electromagnetic Fields with Matter。
  3. Noninteracting Fields。
  4. Quantum Fields with Interaction。
  5. Infinities in Quantum Electrodynamics: Renormalization Problems等。

## 书籍目录

1. Quantum Theory of Free Electromagnetic Fields 1.1 Maxwell's Equations 1.2 Electromagnetic Plane Waves 1.3 Quantization of Free Electromagnetic Fields 1.4 Eigenstates of Electromagnetic Fields 1.5 Coherent States (Glauber States) of Electromagnetic Fields 1.6 Biographical Notes

2. Interaction of Electromagnetic Fields with Matter 2.1 Emission of Radiation from an Excited Atom 2.2 Lifetime of an Excited State 2.3 Absorption of Photons 2.4 Photon Scattering from Free Electrons 2.5 Calculation of the Total Photon Scattering Cross Section 2.6 Cherenkov Radiation of a Schrodinger Electron 2.7 Natural Linewidth and Self-energy

3. Noninteracting Fields 3.1 Spin-Statistics Theorem 3.2 Relationship Between Second Quantization and Elementary Quantum Mechanics

4. Quantum Fields with Interaction

5. Infinities in Quantum Electrodynamics: Renormalization Problems 5.1 Attraction of Parallel, Conducting Plates Due to Field Quantum Fluctuations (Casimir Effect) 5.2 Renormalization of the Electron Mass 5.3 The Splitting of the Hydrogen States  $2s_{1/2}$ - $2p_{3/2}$  The Lamb Shift 5.4 Is There an Inconsistency in Bethe's Approach?

6. Nonrelativistic Quantum Field Theory of Interacting Particles and Its Applications 6.1 Quantum Gases 6.2 Nearly Ideal, Degenerate Bose-Einstein Gases

7. Superfluidity

8. Pair Correlations Among Fermions and Bosons

9. Quasiparticles in Plasmas and Metals: Selected Topics

10. Basics of Quantum Statistics

11. Structure of Atoms

12. Elementary Structure of Molecules

13. Feynman's Path Integral Formulation of Schrodinger's Wave Mechanics

Subject Index
