

<<偏微分方程逆问题>>

图书基本信息

书名：<<偏微分方程逆问题>>

13位ISBN编号：9787506266123

10位ISBN编号：7506266121

出版时间：2004-4

出版公司：世界图书出版公司

作者：Victor Isakov

页数：284

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

## <<偏微分方程逆问题>>

### 内容概要

This book describes the contemporary state of the theory and some numerical aspects of inverse problems in partial differential equations. The topic is of substantial and growing interest for many scientists and engineers, and accordingly to graduate students in these areas.

## &lt;&lt;偏微分方程逆问题&gt;&gt;

## 书籍目录

Preface Chapter 1 Inverse Problems 1.1 The inverse problem of gravimetry 1.2 The inverse conductivity problem 1.3 Inverse scattering 1.4 Tomography and the inverse seismic problem 1.5 Inverse spectral problems Chapter 2 Ill-Posed Problems and Regularization 2.1 Well- and ill-posed problems 2.2 Conditional correctness. Regularization 2.3 Construction of regularizers 2.4 Convergence of regularization algorithms 2.5 Iterative algorithms Chapter 3 Uniqueness and Stability in the Cauchy Problem 3.1 The backward parabolic equation 3.2 General Carleman type estimates and the Cauchy problem 3.3 Elliptic and parabolic equations 3.4 Hyperbolic and Schrödinger equations 3.5 Open problems Chapter 4 Elliptic Equations: Single Boundary Measurements 4.0 Results on elliptic boundary value problems 4.1 Inverse gravimetry 4.2 Reconstruction of lower-order terms 4.3 The inverse conductivity problem 4.4 Methods of the theory of one complex variable 4.5 Linearization of the coefficients problem 4.6 Some problems of nondestructive evaluation 4.7 Open problems Chapter 5 Elliptic Equations: Many Boundary Measurements 5.0 The Dirichlet-to-Neumann map 5.1 Boundary Reconstruction 5.2 Reconstruction in  $\mathbb{R}^n$  5.3 Completeness of products of solutions of PDE 5.4 The plane case 5.5 Recovery of several coefficients 5.6 Nonlinear equations 5.7 Discontinuous conductivities 5.9 Open problems Chapter 6 Scattering Problems 6.0 Directional scattering 6.1 From A to near field 6.2 Scattering by a medium 6.3 Scattering by obstacles 6.4 Open problems Chapter 7 Integral Geometry and Tomography 7.1 The Radon transform and its inverse 7.2 The energy integrals methods 7.3 Boman's counterexample 7.4 The transport equation 7.5 Open problems Chapter 8 Hyperbolic Equations 8.0 Introduction 8.1 The one-dimensional case 8.2 Single boundary measurements 8.3 Many measurements: use of beam solutions 8.4 Many measurements: methods of boundary control 8.5 Recovery of discontinuity of the speed of propagation 8.6 Open problems Chapter 9 Parabolic Equations 9.0 Introduction 9.1 Final overdetermination 9.2 Lateral overdetermination: single measurements 9.3 Lateral overdetermination: many measurements 9.4 Discontinuous principal coefficient 9.5 Nonlinear equations 9.6 Interior sources 9.7 Open problems Chapter 10 Some Numerical Methods 10.1 Linearization 10.2 Variational regularization of the Cauchy problem 10.3 Relaxation methods 10.4 Layer-stripping 10.5 Discrete methods Appendix. Functional Spaces References Index
