

<<微积分 (第1卷)>>

图书基本信息

书名：<<微积分 (第1卷)>>

13位ISBN编号：9787506266253

10位ISBN编号：7506266253

出版时间：2004-11

出版时间：世界图书出版公司

作者：James Stewart

页数：645

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<微积分 (第1卷)>>

内容概要

The first edition was intended to be a synthesis of reform and traditional approaches to calculus instruction. In this second edition I continue to follow that path by emphasizing conceptual understanding through visual, numerical, and algebraic approaches.

The principal way in which this book differs from my more traditional calculus textbooks is that it is more streamlined.

For instance, there is no complete chapter on techniques of integration ; I don ' t prove as many theorems (see the discussion on rigor on page xi) ; and the material on transcendental functions and on parametric equations is interwoven throughout the book instead of being treated in separate chapters.

Instructors who prefer fuller coverage of traditional calculus topics should look at my books *Calculus, Fourth Edition* and *Calculus: Early Transcendentals, Fourth Edition*.

Changes in the Second Edition~ The data in examples and exercises have been updated to be more timely. ~ Several new examples have been added.

For instance, I added the new Example 1 in Section 5.4 (page 381) because students have a tough time grasping the idea of a function defined by an integral with a variable limit of integration.

I think it helps to look at Examples 1 and 2 before considering the Fundamental Theorem of Calculus.

书籍目录

A Preview of Calculus 1 Functions and Models 1.1 Four Ways to Represent a Function 1.2 Mathematical Models
1.3 New Functions from Old Functions 1.4 Graphing Calculators and Computers 1.5 Exponential Functions 1.6
Inverse Functions and Logarithms 1.7 Parametric Curves Laboratory Project Running Circles around Circles
Review Principles of Problem Solving 2 Limits and Derivatives 2.1 The Tangent and Velocity Problems 2.2 The
Limit of a Function 2.3 Calculating Limits Using the Limit Laws 2.4 Continuity 2.5 Limits Involving Infinity 2.6
Tangents, Velocities, and Other Rates of Change 2.7 Derivatives Writing Project: Early Methods for Finding
Tangents 2.8 The Derivative as a Function 2.9 Linear Approximations 2.10 What Does f' Say about f ? Review
Focus on Problem Solving 3 Differentiation Rules 4 Applications of Differentiation 5 Integrals 6 Applications of
Integration 7 Differential Equations 8 Infinite Sequences and Series 9 Vectors and the Geometry of Space 10 Vector
Functions 11 Partial Derivatives 12 Multiple Integrals 13 Vector Calculus Appendixes Index
