书籍目录

Introduction Acknowledgments Part I Introduction to Database Development with Microsoft SQL Server 2005 1
 Introducing Database Development with Microsoft SQL Server 2005 The Process of Storing and Managing
 Data Intronducing Database Systems Understanding the Requirements of a Database System Defining the
 Architecture of a Database Application Using a Monolithic Application with Data Embedded in the
 Application Code Using a Monolithic Application with Data Stored in an External File Using a Database
 Application with Data Managed by a Batabase Server Using an Application with a Generic Data Access Layer
 Using an Application with Separated Presentation,Business,and Data Access Layers Using a Complex
 Application with Multiple Options for each Layer Conclusion 2 Installing and Setting Up Your Microsoft SQL
 Server 2005 Development Environment Using a Virtual PC Operating System Rquirements for Development
 of SQL Server Database Applications Recommended Productivity Tools Using Performance Monitor Using
 Network Monitor Using Upgrade Advisor Recommended Development Tools Microsoft SQL Server 2005
 Editions Microsoft SQL Server express Edition Microsoft SQL Server Workgroup Edition Microsoft SQL
 Server Standard Edition Microsoft SQL Server Enterprise Edition Installing SQL Server 2005 Using the
 Surface Area Configuration Tool Conclusion Chapter2 Quick Reference 3 Reviewing Microsoft SQL Server
 2005 Management ToolsPart II How to Create a Microsoft SQL Server 2005 Database 4 Gathering and
 Understanding Business Requirements before Creating Database Objects 5 Designing a Database to Solve
 Business NeedsPart III How to Query Data from Microsoft SQL Server 2005 6 Reading Microsoft SQL Server
 2005 Data from Client Applications 7 Selecting the Data You Need 8 Creating Views to Encapsulate Queries
 9 Retrieving Data Using Programmable ObjectsPart IV How to Modify Data in Microsoft SQL Server 2005 10
 Inserting Data in Microsoft SQL Server 2005 11 Deleting Data from Microsoft SQL Server 2005 12 Updating
 Data from Microsoft SQL Server 2005Index
