## <<国富论>>

### 内容概要

这是一部彻底改变了劳动与财富观念的书。

在促成我们现代生活方式的诸多因素中，《国富论》可媲美任何一本重要的现代典籍。

《国富论》与《圣经》《资本论》同为人类不朽的智慧宝典。

从国富的基础——劳动，到促进劳动生产力提高的手段——分工，再到因分工而出现的交换，以及交换的媒介——货币，再到商品的价格，以及构成价格的基本成分——工资、地租和利润。

《国富论》总结了近代各国资本主义的发展经验，批判地吸纳了它之前的重要经济理论，对国民经济的运行过程作了系统的整体描述，是现代经济学的集大成之作。

本书为英文版。

## 章节摘录

As it is the nominal or money price of goods, therefore, which finally determinesthe prudence or imprudence of all purchases and sales, and thereby regulates almostthe whole business of common life in which price is concerned, we cannot wonderthat it should have been so much more attended to than the real price. In such a work as this, however, it may sometimes be of use to compare thedifferent real values of a particular commodity at different times and places, or thedifferent degrees of power over the labour of other people which it may, upon different occasions, have given to those who possessed it. We must in this casecompare, not so much the different quantities of silver for which it was commonlysold, as the different quantities of labour which those different quantities of silvercould have purchased. But the current prices of labour, at distant times and places, can scarce ever be known with any degree of exactness. Those of corn, though theyhave in few places been regularly recorded, are in general better known, and havebeen more frequently taken notice of by historians and other writers. We mustgenerally, therefore, content ourselves with them, not as being always exactly in thesame proportion as the current prices of labour, but as being the nearestapproximation which can commonly be had to that proportion. I shall hereafter haveoccasion to make several comparisons of this kind. In the progress of industry, commercial nations have found it convenient to coinseveral different metals into money; gold for larger payments, silver for purchases of moderate value, and copper, or some other coarse metal, for those of still smallerconsideration, They have always, however, considered one of those metals as morepeculiarly the measure of value than any of the other two; and this preference seemsgenerally to have been given to the metal which they happen first to make use of asthe instrument of commerce. Having once begun to use it as their standard, whichthey must have done when they had no other money, they have generally continuedto do so even when the necessity was not the same.
