

<<电子信息类专业英语>>

图书基本信息

书名：<<电子信息类专业英语>>

13位ISBN编号：9787508356976

10位ISBN编号：7508356977

出版时间：2007-8

出版时间：中国电力

作者：高艳萍

页数：282

字数：450000

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<电子信息类专业英语>>

内容概要

本书根据电子信息类专业特点，选编了电路、模拟电子技术、数字电子技术、交直流电机、计算机技术、电子应用技术、通信技术、控制技术、船舶电气和助渔导航设备与系统等领域的原理性和综述性文章，旨在帮助读者掌握和扩大电子信息类专业术语和英语词汇量，提高阅读和理解原版英文文献的能力，掌握英语翻译方法和技巧，为今后了解国内外电子技术的新发展和新动态，为从事科学研究、调试安装和维护进口电子仪器设备打下坚实的基础。

本书可作为高等院校电子信息类专业的专业英语教材，也可供从事相关专业的工程技术人员参考使用。

书籍目录

Part Fundamentals of Electronics UNIT 1 Circuits 1.1 Circuit Elements 1.2 Signal Sources 1.3 The Operational Amplifiers UNIT 2 Analog Electronics Technology 2.1 Semiconductor cells 2.2 The Integrated Circuits 2.3 Electronics UNIT 3 Digital Electronics Technology 3.1 Digital Logic 3.2 Overview of Modern Digital Design 3.3 Memo.s : Part Electric Drive UNIT 1 Motors 1.1 DC Current Motors in Control Systems 1.2 The Three.phase Induction Motor 1.3 Introduction to Industrial Robots UNIT 2 Marine Electricity 2.1 Alternating Currem Generators 2.2 Switchboard 2.3 Protection of Motor RunningPart Computer Technology UNIT 1 Personal Computer 1.1 Computer Hardware 1.2 Programming Language 1.3 Microprocessor UNIT 2 The Applications of Computers 2.1 The Application of Computers 2.2 Distance Education . 2.3 How the Computer Compute UNIT 3 The Technology of Networks 3.1 Networks 3.2 Internet 3.3 VirusPart Electronics Engineering UNIT 1 Systems for Ocean Fishery 1.1 Basic Principles of Simple Sonar Systems 1.2 An Operational Satellite Remote Sensing System for Ocean Fishery UNIT 2 Microwave Technology 2.1 What are the Microwaves 2.2 Microwave Radio System UNIT 3 Radar Technology 3.1 Radar 3.2 Marine Radar Equipment UNIT 4 Images and Television 4.1 A Basic Images Processing System 4.2 Television, HDTV and Movie IndustryPart Communication UNIT 1 The Information Technology (IT) 1.1 100 Years ofIT 1.2 Basic Concept of DSP UNIT 2 Optical Fiber Communication 2.1 A Short History of Fiber Optics 2.2 Optical Communication Systems UNIT 3 Telecommunications 3.1 Overview and History of Telecommunication 3.2 Satellite Services UNIT 4 Mobile Communications 4.1 Overview of Mobile Communications 4.2 Bluetooth Advantage UNIT 5 Data Communication 5.1 Overview of Digital Communication 5.2 Digital Communication Over Fading ChannelsPart Automation UNIT 1 Principle of Single-chip Microcomputer i 1.1 Fundamentals of Single-chip Microcomputer 1.2 Programmable Logical Controller UNIT 2 Control Theory 2.1 Overview of Control 2.2 The Transfer Function and the Laplace Transformation UNIT 3 Process Control System 3.1 A Process Control System. 3.2 Controllers UNIT 4 Stability Analysis 4.1 Stability and the Time Response 4.2 The Frequency Response Methods-Bode Plots UNIT 5 Artificial Intelligence 5.1 The Technology of Expert Systems 5.2 Artificial Neural Networks
