<<中国人民解放军海军>>

内容概要

What kind of an army is the PLA?What stage of development are the various branches of the Chinese armed forces in?What a level of development does military weapons and equipment have reached?These questions have spurred a lively discussion of great concern to the international community and some overseas media.

For this reason , Gao xiaoxing Wen saifei believe that writing a vivid and accurate series of the Chinese army , for both domestic and foreign readers , would be very perinent.

《中国人民解放军海军(英文版)》 is one of these in the first series of books on the Chinese Army.

<<中国人民解放军海军>>
