

<<纤维丛拓扑学>>

图书基本信息

书名：<<纤维丛拓扑学>>

13位ISBN编号：9787510029561

10位ISBN编号：7510029562

出版时间：2011-1

出版时间：世界图书出版公司

作者：Norman Steenrod

页数：229

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<纤维丛拓扑学>>

内容概要

《数学经典教材：纤维丛拓扑学（影印版）》是一部系统讲述纤维丛拓扑学的专著，是首次对该科目进行系统介绍的入门书籍。

纤维丛作为微分几何的不可缺少的一部分，在现代物理中的具有相当重要的位置。

书中从纤维丛的介绍开始，包括微分流形和覆盖面，接着讲述更深层次的话题，如同调，上同调理论，以及纤维丛的更深层次的性质。

对于想要深入全面地学习纤维丛的读者，本书十分合适。

书籍目录

Part I. THE GENERAL THEORY OF BUNDLES
 1. Introduction
 2. Coordinate bundles and fibre bundles
 3. Construction of a bundle from coordinate transformations
 4. The product bundle
 5. The Ehresmann-Feldbau definition of bundle
 6. Differentiable manifolds and tensor bundles
 7. Factor spaces of groups
 8. The principal bundle and the principal map
 9. Associated bundles and relative bundles
 10. The induced bundle
 11. Homotopies of maps of bundles
 12. Construction of cross-sections
 13. Bundles having a totally disconnected group
 14. Covering spaces
 Part II. THE HOMOTOPY THEORY OF BUNDLES
 15. Homotopy groups
 16. The operations of π_1 on π_2
 17. The homotopy; sequence of a bundle
 18. The classification of bundles over the n -sphere
 19. Universal bundles and the classification theorem
 20. The fibering of spheres by spheres
 21. The homotopy groups of spheres
 22. Homotopy groups of the orthogonal groups
 23. A characteristic map for the bundle R^{n+1} over S^n
 24. A characteristic map for the bundle U_n over S^{2n-1}
 25. The homotopy groups of miscellaneous manifolds
 26. Sphere bundles over spheres
 27. The tangent bundle of S^n
 28. On the non-existence of fiberings of spheres by spheres
 Part III. THE COHOMOLOGY THEORY OF BUNDLES
 29. The stepwise extension of a cross-section
 30. Bundles of coefficients
 31. Cohomology groups based on a bundle of coefficients
 32. The obstruction cocycle
 33. The difference cochain
 34. Extension and deformation theorems
 35. The primary obstruction and the characteristic cohomology, class
 36. The primary difference of two cross-sections
 37. Extensions of functions, and the homotopy classification of maps
 38. The Whitney characteristic classes of a sphere bundle
 39. The Stiefel characteristic classes of differentiable manifolds
 40. Quadratic forms on manifolds
 41. Complex analytic manifolds and exterior forms of degree 2
 Appendix
 Bibliography
 Index
