

## <<高等量子力学>>

### 图书基本信息

书名 : <<高等量子力学>>

13位ISBN编号 : 9787510047077

10位ISBN编号 : 7510047072

出版时间 : 2012-8

出版时间 : 世界图书出版公司

作者 : 施瓦布

页数 : 405

版权说明 : 本站所提供之下载的PDF图书仅提供预览和简介,请支持正版图书。

## <<高等量子力学>>

### 内容概要

《高等量子力学(第4版)》讨论了非相对论多粒子系统、相对论波方程和相对论量子场论。它的最大特点是数学知识背景讨论曲面、大量的应用案例和练习，帮助读者全面了解这个科目。《高等量子力学(第4版)》的内容为更深层次学习固态物理学、核物理和基本粒子物理学奠定了基础。《高等量子力学(第4版)》扩展和弥补了作者的《量子力学入门》，那本《量子力学入门》包括了非相对论量子力学，简短介绍了非相对论放射场量子化。在这第四版中增加了不少新的材料并在内容上做了不少更新，在图表的陈列上也达到了格式统一，使得在理解上更加容易。目次：（第一部分）非相对论多粒子系统：二次量子化； $1/2$ 旋转费米子；波色子；相关函数，散射和响应；（第二部分）相对论波方程：相对论波方程及其衍生；lorentz变换和dirac方程协方差；轨道角动量和旋转；colomb势能；foldy-wouthuysen变换和相对论修正；dirac方程解的物理解释；dirac方程的对称和更多性质；（第三部分）相对场：相对场的量子化；自由场；放射场的量子化；相互场，量子电动力学。

读者对象：物理专业的高年级研究生和更高层的科研人员。

## 书籍目录

[目录回到顶部](#)

《高等量子力学(第4版)(英文影印版)》

part i. nonrelativistic many-particle systems

1. second quantization

1.1 identical particles, many-particle states, and permutation symmetry

1.2 completely symmetric and antisymmetric states

1.3 bosons

1.4 fermions

1.5 field operators

1.6 momentum representation problems

2. spin-1/2 fermions

2.1 noninteracting fermions

2.2 ground state energy and elementary theory of the electron gas

2.3 hartree-fock equations for atoms problems

3. bosons

3.1 free bosons

3.2 weakly interacting, dilute bose gas problems

4. correlation functions, scattering, and response

4.1 scattering and response

4.2 density matrix, correlation functions

4.3 dynamical susceptibility

4.4 dispersion relations

4.5 spectral representation

4.6 fluctuation-dissipation theorem

4.7 examples of applications

4.8 symmetry properties

4.9 sum rules

problems

bibliography for part i

part ii. relativistic wave equations

5. relativistic wave equations and their derivation

5.1 introduction

5.2 the klein-gordon equation

5.3 dirac equation

problems

6. lorentz transformations and covariance of the dirac equation

6.1 lorentz transformations

6.2 lorentz covariance of the dirac equation

6.3 solutions of the dirac equation for free particles

problems

## &lt;&lt;高等量子力学&gt;&gt;

- 7. orbital angular momentum and spin
- 7.1 passive and active transformations
- 7.2 rotations and angular momentum problems
- 8. the coulomb potential
- 8.1 klein-gordon equation with electromagnetic field
- 8.2 dirac equation for the coulomb potential problems
- 9. the foldy-wouthuysen transformation and relativistic corrections
- 9.1 the foldy-wouthuysen transformation
- 9.2 relativistic corrections and the lamb shift problems
- 10. physical interpretation of the solutions to the dirac equation
- 10.1 wave packets and "zitterbewegung"
- 10.2 the hole theory problems
- 11. symmetries and further properties of the dirac equation
- 11.1 active and passive transformations, transformations of vectors
- 11.2 invariance and conservation laws
- 11.3 charge conjugation
- 11.4 time reversal (motion reversal)
- 11.5 helicity
- 11.6 zero-mass fermions (neutrinos) problems
- bibliography for part ii
- part iii. relativistic fields
- 12. quantization of relativistic fields
- 12.1 coupled oscillators, the linear chain, lattice vibrations
- 12.2 classical field theory
- 12.3 canonical quantization
- 12.4 symmetries and conservation laws, noether's theorem problems
- 13. free fields
- 13.1 the real klein-gordon field
- 13.2 the complex klein-gordon field
- 13.3 quantization of the dirac field
- 13.4 the spin statistics theorem problems
- 14. quantization of the radiation field
- 14.1 classical electrodynamics
- 14.2 the coulomb gauge
- 14.3 the lagrangian density for the electromagnetic field
- 14.4 the free electromagnetic field and its quantization

## <<高等量子力学>>

14.5 calculation of the photon propagator  
problems

15. interacting fields, quantum electrodynamics

15.1 lagrangians, interacting fields

15.2 the interaction representation, perturbation theory

15.3 the s matrix

15.4 wick's theorem

15.5 simple scattering processes, feynman diagrams

15.6 radiative corrections

problems

bibliography for part iii

appendix

a alternative derivation of the dirac. equation

b dirac matrices

c projection operators for the spin

d the path-integral representation of quantum mechanics

e covariant quantization of the electromagnetic field, the  
gupta-bleuler method

f coupling of charged scalar mesons to the electromagnetic  
field

index
