<<律师评价语言的社会符号学研究>>

内容概要

本书从社会符号学视角入手，综合韩礼德学派的话语分析模式与哈贝马斯的主体间性，针对当前司法改革中的实践问题——律师的法庭辩论语言进行语言学体系构建与理论解释；在理性思辨的基础上，依托实地采录的法庭辩论语料库，有效利用中西话语分析的研究成果，从宏观到微观深入分析了律师在辩论中如何发表评价性意见，揭示了貌似客观的律师话语中所隐含的主观性态度及表现形式，最终论证了律师理性辩论模式的适切性。

本书运用语言学理论来探讨法律交际领域中的具体问题，具有跨学科研究性质，涉及语言学、哲学、法学等学科知识，体现了应用语言学的社会实践价值，因此不仅对法律语言学、话语分析、应用语言学等专业的研究人员与学生有启发意义，对从事司法实践或研究法学文化的学者或学生也有实践参考价值，也合适做英语、法律爱好者的阅读材料。

章节摘录

版权页：插图：Structurally, lawyer evaluation can be identified and described in terms of an evaluator, evaluated and evaluating item. An evaluating item is the locus of an evaluative attitude. An evaluator is the source of evaluative attitudes. The evaluated is the object or entity that evaluative attitudes apply to. The evaluator in this study is specifically made to refer to lawyers. It is realized in nouns / nominal phrase or related pronouns designating lawyers, clients or parties. However, how lawyers show up in text as sources of evaluative attitudes is a process of selection. Generally, there are two options for the presentation of an evaluator in text. It may be directly presented and identified in clauses, or may be concealed and indirectly identified. In the second case, the evaluator is retrievable in the context. The evaluated is the object or entity an evaluative attitude applies to. Realized in nouns or nominal phrases, it can be identified on different scales, either locally at the clause level or globally as part of the macro-topics of lawyer evaluation. Structurally, an evaluating item is the rudimentary element in the identification of lawyer evaluation. As the locus of evaluative attitudes, it has two different realizations, “congruent expression” and “incongruent expression”.
