章节摘录

In China , most people work or study for only five days every week. They can have a rest at the weekend. But not everyone can rest in these two days. Most of them do some interesting things or the things they like. As students , we can do many things. Some students have all kinds of lessons , such as math lessons , English lessons , piano lessons , art lessons and so on. They want to improve (提高) themselves. Some students help their parents do the housework. Some students do some relaxing things , like going shopping or going to a movie. And other students like playing sports. It is good for their health.?
