章节摘录

2. Read the following passage, and tell whether the following statements are true or false. There is one language that people use in every country in the world. The people who use it are young and old, short and tall, thin and fat. Its almost everybodys second language. Its easy to understand, but you cant hear it. Its sign language.

Babies who cant talk can point at things. Theyre using sign languages. Sign language can be useful in places that are very noisy and in places that are very quiet. You can talk to the people who are behind windows. And when you go swimming with your friends, you can have a talk under water !

Many years ago, a Frenchman wanted to help deaf people. He opened the first school for deaf people in Paris in 1760. And they learned sign language there. Teachers and doctors who wanted to help deaf people also went to Paris and had lessons. Then they taught sign language to their students. Soon there were schools for deaf people in other countries.

Today, in the United States, there are special TV news programs for deaf people. The newsreader tells the news in sign language and the words appear on TV, too. () 1) Nearly everybody in the world uses sign language. () 2) Sign language is easy to hear and understand. () 3) Now people who want to learn sign language have to go to Paris. () 4) Today the deaf people in America can also learn news on TV. () 5) Sign language can help deaf people only.

3. Read the following passage, and choose the best answer. Trucks often get very dirty, and many of the drivers ask Bill Jackson to clean the trucks for them. Last week Bill was in the back of a large truck, cleaning. The driver thought that Bill had finished. He closed the door and bolted it. Bill couldnt get out. The driver started traveling down the highway with Bill in the back. Eight hours later, the truck stopped.
