章节摘录

M : Have you deleted some important system files before you had the trouble ?

W : No. I was just working on a file when the power went off. It has not worked since !

M : It would appear that the trouble was caused by the sudden power shut off. The software of your computer would need to be reinstalled , but you have to pay for that work to be done. W : Really ? It is newly bought. Is it not within the maintenance period ?

M : Im sorry. Within one year from the purchase date , the guarantee covers repairs for hardware problems and faulty material , such as the main parts , batteries , screen.. , etc. Software problems are covered only once , for a limited period of three months. Unfortunately , your computer has gone beyond this maintenance period.

W : Oh , my goodness !

How much is it for reinstalling the system ?

M : One hundred. This is a national uniform price offered by Acer. W : It is too expensive for me. Can I do it by myself ?
