## <<英语新题型专练>>

### 内容概要

《新课程高考专项复习：英语新题型专练（IB选修）》依据最新的《浙江省普通高考考试说明·英语》中对英语自选模块的考试要求和样题编写，具有仿真度高、针对性强、适用面广的特点，可作为报考一类院校的考生准备自选综合（IB）模块英语部分的强化训练材料，也可作为考生备考传统题型的补充训练材料。

## 章节摘录

Most people are aware that outdoor air pollution can damage their health , but many donot know that indoor air pollution can also have significant health effects. Environmental Protection Agency studies indicate that indoor levels of pollutants may be 2~5 times , and occa-sionally more than 100 times , higher than outdoor levels. These levels of indoor air pollutantsmaybe of particular concern because most people spend about 90 % of their time indoors. \_\_\_\_\_These include burning sources such as oil , gas , coal , wood , and tobaccoproducts ; building materials and furnishings ; products for household cleaning , personalcare , or hobbies ; central heating and cooling systems ; and outdoor sources , and outdoorair pollution. Immediate effects may show up after a single exposure or repeated exposures. These include a sense of being annoyed , as in relation to the eyes , nose , and throat , headaches , tiredness and so on. \_\_\_\_\_Sometimes the treatment is simply doing away withthe person's exposure to the source of the pollution , if it can be identified. Symptoms ( 症状 ) of some diseases , including asthma , hypersensitivity , pneumonitis , and fever , mayalso show up soon after exposure to some indoor air pollutants. Certain immediate effectsare similar to those from colds or other viral ( 病毒的 ) diseases , so it is often difficult todetermine if the symptoms are a result of exposure to indoor air pollution. \_\_\_\_\_If thesymptoms disappear when a person is away from the home and return when the person re-turms , an effort should be made to identify indoor air sources that may be possible causes. Some effects may be made worse by a not-enough supply of outdoor air or from the heat-ing , cooling , or humidity conditions prevalent in the home. Other health effects may showup either years after exposure has occurred or only after long or repeated periods of expo-sure. These effects , which include some respiratory diseases , heart disease , and cancer , can be severely debilitating or fatal. It is prudent to try to improve the indoor air quality inyour home even if symptoms are not noticeable. \_\_\_\_\_While pollutants commonly found in indoor air are responsible for many harmful ef-fects , there is considerable uncertainty about what concentrations or periods of exposureare necessary to produce specific health problems\_\_\_\_\_Therefore , further research isneeded to better understand the effects of indoor air pollution and to find efficient ways toprotect our health. ....?
