内容概要

The fifth edition of the Textbook of Regional Anatomy remains essential unchanged from the original style and formation of the fourth edition. The whole book consists of the introduction and eight chapters, the head, neck, upper limb, lower limb, thorax, abdomen, pelvis and perineum, and the back and vertebral region. In each chapter, the first section is introduction, the last sections is cross-section anatomy of each part of the body, the each of rest sections includes the dissection and observation, main contents and clinical notes.
