In doing so , a university or college education enables individuals to participate with greater understanding in community affairs. Universities differ from colleges in that they are larger , have wider curricula , are involved in research activities , and grant graduate and professional as well as undergraduate degrees. Degrees Students who pass the regular program of courses receive a bachelors degree in arts , science , commerce , engineering , education , or any of several other fields. Bachelors degrees in law and theology are granted to those possessing a bachelors degree from a college. Graduates may continue their course of study for at least one more year for a masters degree. A masters thesis or project may be required for a degree. The university offers doctors degrees and special certificates. Students may continue working for at least two years beyond the masters level toward the degree of doctor of philosophy , doctor of science , or other types of doctorate.
