## <<新编英语教程>>

### 内容概要

《新编英语教程》(修订版)是供高等学校英语专业四年制本科生使用的综合英语教材,能帮助学生练好坚实的语言基本功,使他们的英语综合技能达到得心应手、运用自如的程度;使他们具有宽广的社会科学和自然科学方面的知识;使他们能灵活地进行有效的社会交际活动。

本教材共分九级:

预备级——为学生提供最基本的英语语音、语法和词汇知识及其应用方法,是日后熟练掌握英语综合技能的奠基石。

本级教材有学生用书、练习册、教师用书。

第1至4级——供基础阶段学生使用,每级都有学生用书、练习册、教师用书、MP3录音。

第5至6级——供高年级学生使用,每级都有学生用书、练习册、教师用书、MP3录音。

第7至8级——供高年级学生使用,每级都有学生用书、练习参考答案。

## 章节摘录

There is no doubt that many scientific and technological developments will have taken place by the time the writers of the 2030s sit down to look forward another years to speculate on life in the 2080s. By that time , perhaps cars will be running on hydrogen taken from the ocean. Perhaps we will all be living in automatically controlled homes , and carrying portable telephones with us wherever we go. Perhaps the world's energy crisis will have become history , with the successful application of nuclear fusion. Most probably we will be entertained by three-dimensional television , and we will all be living for one hundred and twenty years. Other , yet unimagined , changes may lie beyond the horizon awaiting to take us all by surprise. Whatever form these changes take, the face of life in the future will certainly be significantly different. Yet , speaking as one who has the advantage of being able to look back more than fifty years , I look forward to the future with confidence , because , in spite of all the changes , I predict that human beings will still be able to exercise choice in deciding how to run their lives.

Looking back fifty years , we can see enormous changes. In the 1930s there were many people in the world who had never seen a car or listened to a radio. A television set was still a technological dream. The moon was untroubled by man and his missiles , and its back was still an unseen mystery. Nuclear reactions existed only in theoretical physics , and to fly the Atlantic from one continent to another was an adventure experienced by few. However , if we were suddenly transported back in time fifty years , I doubt if we would have any great problems settling into the pattern of the everyday life of the 1930s. Similarly , it seems to me that fifty years from now people will choose to keep the principles and values that they have always believed in. New inventions in the future may change the pattern of life , but the human mind that guides it will not alter. &hellip;&hellip;
