章节摘录

The college of business is conducting a survey of our alumni in an attempt to obtain information which will assist in improving the quality of our academic programs and thereby benefit our current and future students. The information received from you will aid US in identifying the kinds of activities in which our graduates are involved and the progress they have made in their profession , including salary attainment. In addition , our Academic Program Review committee can benefit from information from former students regarding the strengths and weaknesses of our programs as well as suggestions for improving them. The individual information collected will be held in confidence and released only in the form of college and department summary statistics. My staff and I eagerly await your reply. Please return the survey in the enclosed envelope by November 20.
