章节摘录

版权页：插图：此外，丝绸不仅具有较好的散热性能，还有很好的保暖性。

丝绸制成的旗袍给人高贵、华丽的美感，因此深受女性所喜爱。

丝绸又分为很多种，常用于制作旗袍的丝绸包括织锦缎、丝绒、乔其纱等。

织锦缎是一种传统的丝织物，织造时需至少三种彩丝，花纹精致，表面光亮细腻，质地紧密厚实，色彩绚丽悦目。

丝绒是割绒丝织物的统称，表面有平滑整齐的绒毛，质地顺滑、细腻、厚重，有良好的垂感，能表现出穿着者的娴雅、宁静，适合做婚礼等盛大场合的礼服式旗袍。

丝绒的色彩鲜艳，随光线的变化，表面能散发出的不同光泽。

丝绒制成的旗袍触感柔软、色泽华丽，不需要过多的装饰，单单是面料本身在静动之间，光泽的流转变化就足以展现丝绒独特的魅力，体现出穿着者的落落大方、雍容华贵。

高级丝绒面料适合做高领、下摆刚过膝盖的旗袍，如果在胸、领、襟稍加点缀一些装饰，则更为光彩夺目。

乔其纱，俗称“雪纺”，是一种轻薄透明的丝织物。

Velvet is a general term for cut pile fabrics. On its surface are parallel and even flosses, which result in a smooth, fine, and thick texture and a good draping effect. As a result, velvet is a right material for making formal Chi-pao for grand events such as wedding. Velvet clothing can soundly demonstrate the wearer's elegance and quietness. In bright colors, velvet can reflect different luster on its surface in response to the change of the surrounding light. The velvet Chi-pao touches soft and has gorgeous colors, which allow the omission of extra decorations. With the moving of the material alone, the flow and changes of its luster are enough to reveal its unique charm. No wonder the wearers of the velvet Chi-pao look graceful and dignified. Top-grade velvet is suitable for making the Chi-pao with a high collar and a hem just covering the knees. If there are decorations on the chest, collar, and front piece, the Chi-pao will shine more brilliantly.
