内容概要

《大学英语6级考试巅峰训练》是星火英语命题研究组专家为六级考生编写的针对新题型的考前冲刺使用的“一本通”型的参考书。

梯度进阶，各个击破

本书分梯度精析考试重点与难点，考生可根据自己的实际情况制订复习方案，然后选择不同的篇章进行不同题型的专项突破。

精选真题，水平自测

星火命题专家精心挑选六级真题，让考生通过真题演练熟悉考试题型，并通过详细的解析掌握解题技巧。

真题词汇，扫清障碍

星火命题中心利用电脑进行分频统计，提取历年真题中的核心词汇及短语，帮考生扫除阅读中的词汇障碍。

学练结合，解析详尽

根据历年真题归纳命题规律和解题技巧，并进行有针对性的突击训练，由名师进行权威点评，让考生的复习有事半功倍的效果。

全文翻译，精准优美

所有阅读文章均配全文翻译，译文都是名师结合文章背景并推敲每个单词、短语和句子释义后汇编而成，帮助考生详研试题。

五套预测，高效实战

星火命题中心运用S-18系统生成了与真题难度一致的五套预测题，使考生能在考前进行冲刺训练，体验真实的考场氛围。

作者简介

徐青
山东师范大学的优秀教师，长期从事大学英语一线的教学工作。
本人多次参与四、六级考试的阅卷工作，因此十分熟悉各级考试大纲及要求，并将之融入课堂教学，
教学成绩深受学生好评；数次参与大学英语教材、针对性辅导训练书籍以及各级英语考试预测试卷的
编写，内容涵盖听力、阅读、翻译及写作各题型，解析详细，答案权威，深受广大学生的爱戴。

书籍目录

- 预热篇 新题型介绍及网考说明
- 第一篇 写作——妙笔生花有高招
- 第二篇 快速阅读理解——争分夺秒是关键
- 第三篇 听力理解——借只慧耳练听力
- 第四篇 短句问答——有问有答有锦囊
- 第五篇 篇章阅读理解——细致有心取高分
- 第六篇 改错——有错必改需慧眼
- 第七篇 完形填空——完璧归赵靠技巧
- 第八篇 翻译——准确翻译有绝招
- 第九篇 710分考前大预测——傲六级巅峰对决

章节摘录

版权页： The largest metropolitan areas along the seaboard are especially at risk for stronger storms and flooding. East Coast cities will also be more affected by sea level rise than other areas of the US. Today's coastal areas will be very different by the end of this century if we do nothing. On average, global sea levels will go up two to three feet. But scientists expect that in some coastal cities, such as Boston and New York, complex ocean currents that will change as our climate changes will add an extra 8 inches to that increase in water level. Rising sea levels could flood subways and underground sewage (污水) and transportation systems if left unchecked. Or, these cities could become similar to New Orleans, in that they'd need to build infrastructure to protect them from rising sea levels. An increase in the number of extreme storms would cause public health issues by creating a higher risk of waterborne illnesses. Some estimates suggest that at our current rate of climate change, temperature in the Northeast will increase as much as 6 degrees Fahrenheit by century's end. That will make the public health risks during heat waves immeasurably worse than they already are today.

4. Southeast What we could see in 2100: Hurricanes, wind damage, storm surges, flooding, extra sea level rise The Southeastern states will experience less extreme temperature increases than northern and western states, but they will see stronger storms and find themselves more vulnerable to sea level rise. "There are two major factors in terms of sea level rise," says Hurrell. "The first is thermal expansion. The second is that more fresh water will be added to the oceans." "There are three main risks in the Southeast," says Trenberth. "There is risk for increased wind damage, risk for a storm surge, which is very coastal and worsened by higher sea levels, and then a bit further inland, there is an increased risk of flooding from heavy rains." Waterborne diseases are more likely to be prevalent in a flood zone and will create additional risk to public health.

编辑推荐

《星火英语:大学英语6级考试巅峰训练(套装共2册)》通过对全国各大城市多所高校考生的调查分析和对数千份有效问卷的总结,命题研究组发现考生不是缺少通过六级考试的能力而是缺少科学地学习、记忆和复习的方法,所以命题研究组的专家在《星火英语:大学英语6级考试巅峰训练(套装共2册)》中融入了图表式记忆的方法和“巅峰式优化设计学习方案”,相信对广大考生的学习一定会有很大的帮助。
