<<语言类型学与普遍语法特征>>

内容概要

《语言类型学与普遍语法特征》主要介绍：Comparison of the grammars of human languages reveals systematic patterns of variation. Research in typology and universals attempts to uncover those patterns. To formulate the universal constraints on language that define those patterns, and to seek explanations for the universals. In this volume, the first of its kind, William Croft provides the reader with a comprehensive introduction to the method and theory used in typology-universals research. Together with an overview of basic grammatical differences between languages. He discusses theoretical issues ranging from the most fundamental-on what basis can the grammars of diverse languages be compared?-to the most abstract-what is the role of functional and historical explanation of language universals?-and gives extensive illustration from the world's languages. Several case studies also provide extended examples of the methodologies applied to specific problems. As well as explicating basic concepts established in the last thirty years. Current areas of typological research are thoroughly covered (including some discussion of phonological typology). The author demonstrates how complex patterns of cross-linguistic variation. Such as hierarchies and prototypes. Are built on the basic patterns of implicational universals and markedness. He also draws together contemporary research on cross-linguistic patterns of the form-meaning relation and on universals of language change, and shows how a new approach to linguistic explanation, the "functional-typological" or "dynamic" paradigm, has evolved in the last decade. This textbook will appeal to scholars and students alike in linguistics and anthropology.

书籍目录

Preface by Halliday Preface and Acknowledgments Abbreviations 1. Introduction 1.1 Definitions and scope of typology 1.2 Cross-linguistic comparison 1.3 The problem of cross-linguistic comparability 1.4 Non-typological factors and the sampling problem 1.5 Data sources 2. Typological classification 2.1 Introduction 2.2 the concept of a linguistic type (strategy) 2.3 morphological typology 3. Implicational universals 3.1 Restrictions on possible language types 3.2 Unrestricted and implicational universals 3.3 Deeper explanations for word-order universals 4. Markedness in typology 4.1 Introduction 4.2 Markedness and implicational universals 4.3 Criteria for markedness 4.3.1 Structure 4.3.2 Behavior 4.3.2.1 Inflectional behavior 4.3.2.2 Distributional behavior 4.3.3 Frequency 4.3.4 Neutral value 4.4 Conclusion 5. Grammatical hierarchies 5.1 Introduction 5.2 Hierarchies , implicational universals and markedness..... 6. Prototypes and the interaction of typological patterns 7. External motivation and the typology of form-function relations 8. Diachronic typology 9. Linguistic explanation in the dynamic paradigm Notes References Map of languages cited Author index Language index Subject index Croft : Typology and Universals : Errata 文库索引
