

<<人类学习的理论>>

图书基本信息

书名：<<人类学习的理论>>

13位ISBN编号：9787560043685

10位ISBN编号：7560043682

出版时间：2004-10

出版时间：外语教研

作者：勒弗朗索瓦

页数：385

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

书籍目录

Read This First 导读 Part One The First Words : Science and Theory Chapter 1 Human Learning : Science and Theory This Chapter Objectives Psychology and Learning Learning Performance Versus Learning Theory Theories, Principles, Laws, and Beliefs Purposes of Theories Characteristics of Good Theories Science and the Development of Psychological Theories What Is Science ?

Rules of the Scientific Method Experiments Thinking Critically About Psychological Research Human and Nonhuman Subjects Ethics of Animal Research Humans as Subjects Learning Theory : A Brief Overview Recent Origins of Learning Theory Preview of the Text Summary Mostly Behavioristic Theories Chapter 2 Pavlov, Watson, and Guthrie : Early Behaviorism This Chapter Objectives The Beginning of Scientific Psychology Early Psychophysics Ivan P. Pavlov (1849-1936) Classical Conditioning Explanations for Stimulus-Response Associations Variations in Contiguity Acquisition, Extinction, and Recovery Pavlovs Classical Conditioning : An Appraisal John B. Watson (1878-1958) Behaviorism A Classical Conditioning Explanation of Learning Emotional Learning Transfer Watson s Environmentalism Higher Learning Applying Watsons Psychology Watsons Behaviorism : An Appraisal Edwin Guthrie (1886-1959) Guthries Law of One-Shot Learning Practice Movement Produced Stimuli (MPS) Habits Forgetting Reward and Punishment Practical Applications of Guthries Theory Breaking Habits Guthries One-Shot Learning : An Appraisal Early Behavioristic Theories : Evaluation Summary Chapter 3 Thorndike and Hull : The Effects of Behavior This Chapter Objectives Edward L. Thorndike (1874-1949) Animal Intelligence Contiguity or Reinforcement Thorndike s Pre-1930s Theory Subsidiary Laws Thorndike s Post-1930 Theory Thorndikes Connectionism : An Appraisal Clark L. Hull (1884-1952) Hulls System : An Overview Main Components of Hulls System Graphic Summary of Hulls System Input Variables : Predictors Intervening Variables Output Variables : The Predicted Fractional Antedating Goal Reactions Habit-Family Hierarchies Hulls Formal Behaviorism : An Appraisal Summary Chapter 4 Skinners Radical Behaviorism : Operant Conditioning This Chapter Objectives Is Skinners Radical Behaviorism Antitheoretical ?

Overview of Skinners Radical Behaviorism Reinforcement Types of Reinforcement Punishment Illustrations of Reinforcement and Punishment Sources of Reinforcement Schedules of Reinforcement Continuous or Intermittent Reinforcement Effects of Reinforcement Schedules Schedules of Reinforcement in Everyday Life Shaping Chaining Shaping and People Fading, Generalization, and Discrimination Illustration 1 : Pigeons Reading Illustration 2 : Quail Loving Relevance to Human Learning The Science Applied to Humans Control Through Positive Contingencies Control Through Negative Contingencies Imitation and Operant Conditioning Sources of Reinforcement in Imitation Three Effects of Models Behavior Management Positive Reinforcement and Punishment Counterconditioning Extinction Imitation Skinners Position : An Appraisal Contributions Evaluation as a Theory Some Philosophical Objections Summary Chapter 5 Learning and Biology : Evolutionary Psychology This Chapter Objectives Learning Taste Aversions Conditioning Explanations of Taste Aversion The Phenomenon of Blocking Evolutionary Psychology Autoshaping Instinctive Drift Biological Constraints in Evolutionary Psychology Sociobiology : A Branch of Evolutionary Psychology Inclusive Fitness and Altruism Criticisms of Sociobiology Evolutionary Psychology : An Appraisal Biofeedback : A Practical Application of Conditioning Theories Operant Conditioning and Autonomic Responses How Biofeedback Works The Beginning of a Transition Summary The Beginnings of Modern Cognitivism Chapter 6 Hebb, Tolman, and the Gestaltists : Toward Modern Cognitivism This Chapter Objectives Hebb s Theory : A Look at Higher Mental Processes Higher Mental Processes The Neurological Basis of Learning Components and Functioning of the Central Nervous System Possible Neurological Changes Underlying Learning Hebb s Neurophysiological Assumptions Reactivity and Plasticity Mediating Processes : Hypotheses and Assumptions Hebb s View of Learning and Thinking Set and Attention Hebb s Theory : An Appraisal From Behaviorism to Cognitivism Mechanistic Behaviorism Tolmans Purposive Behaviorism Do Rats Have Purpose ?

Four Summary Principles Tolman s Purposive Behaviorism : An Appraisal Basic Beliefs of Gestalt

<<人类学习的理论>>

Psychology
Insight Versus Trial and Error
The Whole Is Greater Than the Sum of Its Parts
Gestalt Theory : The
Laws of Perception
Gestalt Views of Learning and Memory
Beyond Perception : The Psychological Field
