<<顶尖家居>>

内容概要

The 21st century is an era of pursuing rational consumption. The grade is not reflected in the increase of wealth, but deep in the heart of the concern to withstand time flying, which is really valuable. 21世纪是一个理性消费的时代。品位绝不是体现在财富的攀升上，而是关注内心深处的需求能够经得起时间的沉淀，这才是真正有价值的东西。

章节摘录

The design of the 21st century will be different from the minimalism design which was popular in the past few years emphasizing innovation in appearance. The application of new materials and new technologies will be given more attention. New materials and new technologies suggest that design has come into a new era that breaks the rule and heaviness of normal furniture and brings many new design ideas. The leisurely and relaxed design has become the logo of top design and the holy land of design field. Exciting and progressive design is based on the application of new materials and new technologies all the time. Along with the rapid development of modern science and technology, 3D fibreglass, gelinite, swollen aluminum, 3D fabric and diving material appear one after another. New products can be produced due to these new materials. The design of future products should be organic, portable, concise, soft, poetic, functional and modular from the aspect of aesthetic view.
