

<<非木材纤维制浆造纸新技术>>

图书基本信息

书名：<<非木材纤维制浆造纸新技术>>

13位ISBN编号：9787562325109

10位ISBN编号：7562325103

出版时间：2006-10

出版时间：华南理工大学出版社

作者：詹怀宇，谌凡更，付时雨 编

页数：456

字数：1039000

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<非木材纤维制浆造纸新技术>>

内容概要

Paper industry is a mainstay industry and was recognized as an inexhaustible promising industry. It provides us commercial material for packing, printing, publishing and information industries, can leads development of forestry, machinery and chemical engineering etc. In China, paper has been produced from non-wood fibrous raw materials since Han Dynasty. Up till now, China still produces largest amount of paper from non-wood fiber. The China Technical Association of Paper Industry hosted the 1988 International Non-Wood Fiber Pulping and Papermaking Conference in Beijing. After that the conference was successfully held in Shanghai, Beijing and Jinan in 1992, 1996 and 2000 respectively. This indicates that both the enterprises and technicians attach importance of papermaking from non-wood fibers.it's our honor to organize the 5th International Non-Wood Fiber Pulping and Papermaking Conference at South China University of Technology. The State Key Laboratory of Pulp and Paper Industry has been applying itself on the fiber chemistry, pulping, bleaching and papermaking from non-wood fibrous raw materials since its establishment. A great number of achievements have been made. The conference provides us an opportunity to communicate the latest achievements in non-wood fiber pulping and papermaking. A total of 94 papers have been accepted after the review by the committee members. We believe that the academic exchange will favor the advance of the technology of papermaking. We would like to express our thanks to the National Natural Science Foundation of China for financial support. We are also thankful to China Technical Association of Paper Industry and South China University of Technology for their support. The support from the members of program committee and organization committee is also appreciated.

书籍目录

Session 1 Resources and Characteristics of Nonwood Fibers CORNSTALK AS A SOURCE OF FIBER AND ENERGY CHEMICAL AND PULPING CHARACTERISTICS OF CORN STALK FRACTIONS STRUCTURAL CHANGES OF RESIDUAL LIGNIN IN WHEAT STRAWSULFITE- FORMALDEHYDE PULP DURING OXYGEN DELIGNIFICATION SYNTHESIS AND STRUCTURAL CHARACTERIZATION OF QUATERNIZEDHEMICELLULOSES ISOLATION AND CHARACTERIZATION OF HEMICELLULOSES FROM BAGASSE NON-WOOD AGRICULTURAL RESIDUES AND CROPS AS A SOURCE OF CELLULOSE FIBRES FOR DIFFERENT APPLICATION Naceur Belgacem CHANGES OF LIGNIN STRUCTURE DURING METABOLISM BY RABBIT ARUNDO DONAX- PLANTATION ESTABLISHMENT AND PULP QUALITY IN AUSTRALIA THE EFFECT OF FIBER LENGTH AND COARSENESS ON THE TEARING STRENGTH HYDROLYSIS OF CELLULOSE OF BAMBOO FIBER DURING DISSOLUTION

Session 2 Fiber Chemistry and Utilization of Nonwood Fibers LIGNIN PRECIPITATION ON THE FIBER SURFACE IN THE ETHANOL-BASED ORGANOSOLV PULPING OF WHEAT STRAW EFFECT OF XYLANASE TREATMENT ON LIGNIN CONSTRUCTION OF WHEATSTRAW VARIATION OF CEREAL STRAW CHEMICAL COMPOSITION IN DIFFERENT VARIETIES AND LOCATIONS IN ALBERTA SUCCINOYLATION OF SUGARCANE BAGASSE CELLULOSE IN IONIC LIQUID CHEMICAL MODIFICATION OF SUGARCANE BAGASSE WITH DIFFERENT CYCLIC ANHYDRIDES EFFECT OF LIGNIN STRUCTURE ON BLEACHING PERFORMANCE AND BRIGHTNESS OF WHEAT STRAW CMP STUDIES ON THE CHEMICAL AND THERMOCHEMICAL CHARACTERISTICS OF BAGASSE ENZYMATIC MILD ACIDOLYSIS LIGNIN (EMAL) CHARACTERIZATION OF ACETYLATED SUGARCANE BAGASSE HEMICELLULOSES STUDY ON THE BONDS BETWEEN LIGNIN AND XYLAN BY CARBON-13 ISOTOPIC TRACER METHOD PREPARATION AND CHARACTERIZATION OF CARBOXYMETHYLCELLULOSES ALKALI STABILITY OF SILICON IN DIFFERENT MORPHOLOGICAL REGIONS OF WHEAT STEM FIBER PROPERTIES - PAPER QUALITY MULTIDIMENSIONAL FIBER CHARACTERIZATION

Session 3 Advances in Nonwood Fiber and Pulp Bleaching Pulping, Chemimechanical Pulping CHEMICAL MECHANICAL PULPING OF KENAF AND JUTE FOR VALUE-ADDED PAPER GRADES A METHOD FOR THE ESTIMATION OF RELATIVE REACTIVITY OF ACTIVE OXYGEN SPECIES UNDER OXYGEN BLEACHING CONDITIONS KINETICS OF AUTO-CATALYZED ETHANOL-WATER DELIGNIFICATION OF REED TCF BLEACHING OF BAMBOO EMCC PULP BOOSTED BY PERACETIC ACID IMPROVEMENT IN BLEACHABILITY OF PULPS FROM NON-WOOD RAW MATERIALS USING ACID FOLLOWED BY ALKALINE PEROXIDE TREATMENT INVESTIGATION ON THE PHOTOCATALYSIS BLEACHING OF KRAFT REEDPULP TCF BLEACHING WITH OZONE FOR WHEAT STRAW KRAFT PULP.....

Session 4 Advances in Nonwood Pulp Papermaking and Wet End Chemistry

Session 5 Environmental Chemistry in nonwood Fiber Processing and Waste Utilization

Session 6 Biotechnology in Nonwood Fiber Processing
