

<<高分子物理导论>>

图书基本信息

书名：<<高分子物理导论>>

13位ISBN编号：9787562333883

10位ISBN编号：7562333882

出版时间：2011-2

出版时间：华南理工大学

作者：华南理工大学高分子物理教学组

页数：312

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

## <<高分子物理导论>>

### 内容概要

华南理工大学高分子物理教研组的六位老师, 以何曼君等人编写的《高分子物理(修订版)》(复旦大学出版社)的内容为基础, 参考国外有关教科书, 编写了这本英文版的《高分子物理导论》, 供本科生双语教学使用。

英语《高分子物理》教科书与汉语的《高分子物理》教科书相对应。

## 书籍目录

## Chapter 1 STRUCTURE OF POLYMER CHAIN

## 1.1 Introduction

- 1.1.1 Introduction to Polymer Science
- 1.1.2 From Small Molecules to Big Molecules
- 1.1.3 Future Topics for Polymer Science
- 1.1.4 Major Characteristics of Polymer Structure
- 1.1.5 Contents of Polymer Structure

## 1.2 Short—range Structure of Polymer Chain

- 1.2.1 The Chemical Composition of Repeating Units
- 1.2.2 Bonding Methods of Monomers
- 1.2.3 Branch and Cross-linking of Polymer Chain
- 1.2.4 Sequential Structure of Copolymer
- 1.2.5 Configuration of Polymer Chain

## 1.3 Long—range Structure of Polymer Chain

- 1.3.1 Size and Shape of Polymer Chain
- 1.3.2 Internal Rotation and Conformation of Polymer Chain
- 1.3.3 Flexibility of Polymer Chain
- 1.3.4 Factors of Influence on Polymer Chain Flexibility

## 1.4 Conformation Statistics of Polymer Chain

- 1.4.1 Geometry Calculation of Average Square End—to—end Distance
- 1.4.2 Statistical Calculation of Average Square End—to—end Distance

## Distance

- 1.4.3 Characteristics of Polymer Chain Flexibility
- 1.4.4 Radius of Gyration of Polymer Chain
- 1.4.5 Wormlike Chain

## Chapter 2 CONDENSED STATE STRUCTURE OF POLYMERS

## 2.1 Van Der Waals Force and Hydrogen Bonding

- 2.1.1 Primary Bonds
- 2.1.2 Secondary—bond Forces
- 2.1.3 Intermolecular Forces and Physical Properties

## 2.2 Form and Structure of Crystalline Polymers

- 2.2.1 Morphology of Crystalline Polymers
- 2.2.2 Conformation and Unit Cell of Crystalline Polymers

## 2.3 Structural Models of Polymers

- 2.3.1 Structural Models of Crystalline Polymers ?
- 2.3.2 Structural Model of Amorphous Polymers

## 2.4 Crystalline Processes of Crystalline Polymers

- 2.4.1 Structure and Ability of Polymer :
- 2.4.2 Crystallization Process of Polymers
- 2.4.3 The Rate of Crystallization and Its Measurement

## Methods

- 2.4.4 The Avrami Equation
- 2.4.5 The Degree of Crystallinity
- 2.4.6 Experimental Determination of Crystallinity

## <<高分子物理导论>>

### 2.5 Crystallization Thermodynamics of Polymers

- 2.5.1 Melting Phenomena and the Melting Temperature
- 2.5.2 Theory of Melting Point Depression
- 2.5.3 Example Calculation of Melting Point Depression
- 2.5.4 Experimental Thermodynamic Parameters
- 2.5.5 Entropy of Melting
- 2.5.6 The Hoffman—Weeks Equilibrium Melting Temperature
- 2.5.7 Effect of Chemical Structure On the Melting

#### Temperature

### 2.6 Oriented Structure of Polymers

- 2.6.1 The Production of Orientation in Synthetic Polymers
- 2.6.2 Deliberate Orientation by Processing in the Solid

#### State

- 2.6.3 Deliberate Orientation by Processing in the Fluid

#### State

- 2.6.4 Cold Drawing and the Natural Draw Ratio
- 2.6.5 Oriented Polymers—models and Properties
- 2.6.6 Highly Oriented Polymers and Ultimate Moduli

### 2.7 Liquid—crystal Polymers

- 2.7.1 Introduction
- 2.7.2 Types of Mesophases for Small Molecules
- 2.7.3 Types of Liquid-crystal Polymers
- 2.7.4 The Processing of Liquid—crystal Polymers
- 2.7.5 The Properties and Applications of Liquid—crystal

#### Polymers

### 2.8 Structure and Properties of Blending Polymers

- 2.8.1 Conditions for Polymer polymer Miscibility
- 2.8.2 Experimental Detection of Miscibility
- 2.8.3 Compatibility and Examples of Polymer Blends
- 2.8.4 Morphology
- 2.8.5 Properties and Applications

## Chapter 3 PROPERTIES OF POLYMER SOLUTIONS

### 3.1 Dissolution of Polymers

- 3.1.1 Dissolution Process
- 3.1.2 Cohesive Energy Density and Thermodynamics for Polymer

#### Dissolution

### 3.2 Thermodynamics of Polymer Solutions

- 3.2.1 The Ideal Solution
- 3.2.2 Statistical Thermodynamics of Mixing
- 3.2.3 Dilute Solutions
- 3.2.4 Values for the Flory-Huggins Parameter
- 3.2.5 A Worked Example for the Free Energy of Mixing

### 3.3 Semidilute Polymer Solutions

- 3.3.1 The Dilute to Semidilute Transition
- 3.3.2 Semidilute Regime Scaling Laws
- 3.3.3 The Correlation Length, in the Semidilute Solution

### 3.4 Concentrated Polymer Solutions

## <<高分子物理导论>>

3.4.1 Plasticization of Polymers

3.4.2 Spinning Solutions

3.4.3 Gels

3.5 Polyelectrolyte Solutions

3.6 Miscibility of Polymer Blends

3.6.1 Phase Diagrams

3.6.2 Thermodynamics of Phase Separation

3.6.3 An Example Calculation: Molecular Weight Miscibility

Limit

3.7 Hydrodynamics Properties of Polymer Solutions

3.7.1 The Diffusion of Polymer in Solutions

3.7.2 Viscose Flow of Polymer in Solutions

Chapter 4 MOLECULAR WEIGHT AND MOLECULAR WEIGHT DISTRIBUTION OF POLYMERS

4.1 Polymer Size and Shape

4.2 Molecular Weight Averages

4.3 Determination Methods of Molecular Weight

4.3.1 End-group Analyses

4.3.2 Osmotic Pressure

4.3.3 Light scattering

4.3.4 Flight Time

4.3.5 Viscometry

4.4 Determination Methods of Molecular Weight Distribution

4.4.1 Phase Separation and Fractionation

4.4.2 Gel Permeation Chromatography

Chapter 5 MOLECULAR CHAIN MOTION

5.1 Introduction to Molecular Chain Motion

5.1.1 Simple Mechanical Relationships and Their Concepts

5.1.2 Polymer Relaxation and Transition

5.1.3 Polymer Molecular Chain Relaxation and Transition

5.2 The Glass Transition

5.2.1 Introduction

5.2.2 Methods of Measuring Transitions in Polymers

5.2.3 Theories of the Glass Transition

5.2.4 Factors of Influence on Glass Transition Temperature

5.3 Viscosity Flow of Polymer

5.3.1 Characteristics of Viscosity Flow

5.3.2 Measure of Shear Viscosity

5.3.3 Factors of Influence on Viscosity Flow Temperature

Chapter 6 MECHANICAL BEHAVIOUR OF POLYMERS

6.1 Mechanical Behaviour of Amorphous and Crystalline

Polymers

6.1.1 Basic Physical Quantities Describing Mechanical

Behaviour

6.1.2 Several Common Terms of Mechanical Properties

6.1.3 Tensile Properties of Various Polymers

6.1.4 Yield of Polymers

<<高分子物理导论>>

- 6.1.5 Fracture and Theoretical Strength of Polymers
- 6.1.6 Factors Affecting the Actual Strength of Polymers
- 6.2 Mechanical Behaviour of Elastic Polymers
  - 6.2.1 Application Temperature Range of Rubbers
  - 6.2.2 Characteristics of Elasticity
  - 6.2.3 Phenomenological Descriptions of Rubber Elasticity
  - 6.2.4 Thermodynamic Analysis of Rubber Elasticity
  - 6.2.5 Statistical Thermodynamics of Rubber Elasticity
  - 6.2.6 Effects of the Structure of Cross—links and Networks on the Rubber Elasticity
  - 6.2.7 Internal Energy Effects on the Rubber Elasticity
  - 6.2.8 Ultimate Properties of Rubber
- 6.3 Mechanical Relaxation of Polymers Viscoelasticity
  - 6.3.1 Mechanical Relaxation Phenomenon of Polymers
  - 6.3.2 Mechanical Models for Viscoelasticity
  - 6.3.3 The Relationship between Viscoelasticity and Time and Temperature Time—temperature Equivalence Principle
  - 6.3.4 The Boltzmann Superposition Principle(BSP)
- Chapter 7 ELECTRICAL AND OPTICAL PROPERTIES OF POLYMERS
  - 7.1 Electrical Polarization and Dielectric Constant of Polymers
    - 7.1.1 Polarization of Dielectric Media in Electric Field
    - 7.1.2 Interpreting Polarization Effect of Polymer from Molecular Level
    - 7.1.3 Relation between Dielectric Constant and Molecular Polarizability
    - 7.1.4 The Dielectric Constants of Polymers
  - 7.2 Dielectric Loss of Polymers
    - 7.2.1 Dielectric Relaxation and Dielectric Loss
    - 7.2.2 Characterization of Dielectric Loss
    - 7.2.3 Some Factors Affecting on Dielectric Relaxation and Dielectric Loss
    - 7.2.4 Spectra of Dielectric Relaxation in Solid Polymers
  - 7.3 Conduction in Polymers
    - 7.3.1 Characterization of Electric Conduction
    - 7.3.2 Conductive Characteristics of Polymers
    - 7.3.3 Volume Resistivity and Surface Resistivity
    - 7.3.4 Dependence Relation between Conduction and Structure in Solid Polymer
    - 7.3.5 Influence of Other Factors
  - 7.4 Dielectric Breakdown of Polymers
    - 7.4.1 Dielectric Breakdown and Dielectric Strength
    - 7.4.2 Dielectric Breakdown Mechanisms of Polymer
  - 7.5 Electrostatic Charge Phenomena on Polymer
  - 7.6 Optical Properties of Polymers
    - 7.6.1 Transparency and Colourlessness
    - 7.6.2 The Refractive
