章节摘录

(3) All risks. Aside from the risks covered under the F. P. A. and W. P. A. conditions as above, this insurance also covers all risks of losses or damages to the insured goods whether partial or total, arising from general external causes in the course of transit. Additional coverage As above-mentioned, this kind of risk can't be covered independently; they shall be covered depending on one kind of the basic risks. According to the nature of goods insured, the cargo owner may choose any of the three basic covers. If more protections are needed, he may further insure his goods against one or several additional risks.

(1) General additional risks.

Risk of theft, pilferage and non-delivery (T. P. N. D.). Risk of theft and pilferage refers to the risk against the cargo's being stolen in transit of voyage. Risk of non-delivery refers to the risk against loss of complete packages due to improper unloading or for some unknown reasons.

Risk of fresh water and/or rain damage. The risk of damage to the goods by fresh water and/or rain is covered by this coverage.

Risk of shortage. This risk covers the shortage of weight for the goods due to the external packing broken. However, normal shortage of weight in transit is not covered.

Risk of intermixture and contamination. Damage to the goods caused by its being intermixed or contaminated with each other is covered by this risk.

Risk of leakage. It covers the risk of leakage of the liquid goods caused by the damaged container.

Risk of clash and breakage. The risk of breakage of the fragile goods by vibration, clash or pressing is covered by this risk.

Risk of taint of odor. It covers risk of taint of odor of the edibles, Chinese medicine, toilet material, etc., occurring during the course of transit effected by other goods.

Risk of sweat and heating. It covers risks of sweat, heating and wetting occurring during the course of transit arising from sudden change of temperature or break down of ventilation of the carrying vessel.

Risk of hook damage. It covers damage to the goods caused by hooks in the process of loading and unloading including expenses of recondition or change of packing.

Risk of breakage of packing.

编辑推荐

《21世纪高职高专精品教材·经济贸易类：外贸英语（第2版）》的结构合理、体系完整，在内容上注意外贸专业知识、实际业务操作以及英语运用三者之间的密切配合；内容充实，而且在组织上选用国际最新资料，实用性强；如此丰富的设置非常有利于学生掌握专业外语知识，并提高学生的专业外语应用能力。
