<<社会工作专业英语>>

前言

美国的一位学者在《纽约时报》的一篇社论中说：“一种新的职业已经并且正在我们鼻子底下日渐成熟，这就是社会工作”。

社会工作是一种专门的职业，是一种运用科学的方法和艺术的手段去解决各种各样社会问题的职业。

社会工作在中国正成为一种新型职业，社会的快速发展及人民群众对社会工作者越来越专业化的要求，催生了社会服务领域任职要求的变化。

今后，将逐步要求受过专门的社会工作职业教育的人才能上岗就业，在可预见的将来，一些由非专业人士占据的社会工作岗位和未来出现的一些新岗位，将由新一代职业社会工作者或掌握社会工作知识技能的“复合型”人才来填充。

我国1988年在北京大学最先开设了社会工作专业。

此后国内其他大学相继开设，社会工作专业主要培养具有基本扎实的相关理论知识、熟练的社会调查研究技能和社会工作能力，能在教育、民政、劳动、社会保障和卫生部门，以及工会、青少年、妇女等社会组织及其他社会福利、服务和公益团体等机构从事社会保障、社会政策研究、社会行政管理、社区发展与管理、社会服务、评估与操作等工作的高级专门人才。

<<社会工作专业英语>>

内容概要

本书共分为15个单元，分别介绍了国内外有关社会工作的典型案例，希望通过这些案例为我国从事社会工作的人员提供所需的经验和资料。

- Unit 14
 - Part A Getting a Job in State Government
 - Part B These Teens Know How to Say No

Unit 15

Part A My First Week as a Social Worker

Part B What You Dont Know about Money and Happiness

章节摘录

Responsible fatherhood is the single most important factor in the prevention of domestic violence. It is so important that our treatment for domestic violence offenders, one of the most successful in the world, constantly stresses close emotional bonds with children. The logic is simple. We know from research that strong bonds with children increase self-value. And who is more likely to abuse, the valued self or the devalued self ?

The more a man values his children, the less likely he is to hurt their mother. In the vast majority of cases, the safest partner relationships are those in which the father feels emotionally connected to his children. Science has known for a long time that emotional connection inhibits violence and that disconnection is a cause of violence. Violent criminals usually lack what sociologists call a stake in the community: job, marriage, positive neighborhood connections, religious affiliation, and satisfying relationships with children. Serial killers and terrorists never have close relationships with their children. Historically, armies wanted soldiers before they married or had children; when they did have them, they were kept isolated from them. Even in the other social animals, males connected to the pack are more cooperative and serve as significant protectors of the pack, while those driven from it become "rogue" predators.
