

<<现代航空发动机多变量控制系>>

图书基本信息

书名：<<现代航空发动机多变量控制系统>>

13位ISBN编号：9787810775908

10位ISBN编号：7810775901

出版时间：2005-10

出版时间：北京航空航天大学出版社

作者：孙健国

页数：621

字数：548000

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<现代航空发动机多变量控制系>>

内容概要

本书阐述现代航空发动机多变量控制系统设计方法及概念：航空发动机及其控制系统的发展趋势；航空发动机建模；各种航空发动机现代控制规律的设计；发动机容错控制系统设计以及飞行/推进综合控制系统设计。

本书可作为航空发动机控制和航空发动机总体专业工程技术人员的参考书，也可作为上述专业的研究生教材。

书籍目录

Chapter 1 State of the Art and Problems of the Development of Aeroengines and Their Control Systems 1.1 System Approach to the Development of Complex Technical Systems 1.2 Tendencies of the Aeroengine Development 1.3 Tendencies of the Development of Production and Technological Systems 1.4 Tendencies of the Aeroengine Control System Development 1.5 System Conception of Designing Aeroengine Control Systems References 57

Chapter 2 Modeling of Aeroengines 2.1 Introduction 2.2 Component Level Model 2.2.1 Inlet 2.2.2 Fan 2.2.3 Compressor 2.2.4 Engine Bleeds 2.2.5 Turbines 2.2.6 Main Combustor 2.2.7 Augmentor 2.2.8 Bypass Duct 2.2.9 Exhaust Nozzle 2.2.10 Engine Dynamics 78 2.2.11 Remarks 83 2.3 State Variable Model 2.3.1 Partial Derivative Method 2.3.2 Fitting Method 2.3.3 Remarks 2.3.4 Simulation Results 2.4 Adaptive Model 2.4.1 Adaptive Model Estimating Unmeasured Outputs 2.4.2 Component Tracking Filter 2.5 Intelligent Model 2.5.1 Modeling by Neural Network 2.5.2 Modeling with Genetic Algorithm 2.6 Estimator of Aeroengine Performance Parameters 2.6.1 Introduction 2.6.2 Model Based Control 2.6.3 Estimator Based Control References

Chapter 3 Adaptive Control Systems of Aeroengines 3.1 Introduction 3.2 The Main Types of Adaptive Systems 3.3 The Structure of Multivariable MRAC Systems 3.3.1 Design of Generalized Tuned Plant 3.3.2 Self Tuning Algorithms 3.4 Linearized Model of Multivariable MRAC Systems 3.5 Design of Multivariable MRAC Systems 3.5.1 Design of the Coupled Correcting Device 3.5.2 Design of Non Coupled Correcting Device 3.6 Non Linear Correction of Self Tuning Algorithms 3.7 Structural Features of Multivariable MRAC Systems for Aeroengines 3.8 Design of Linearized Model of Multivariable MRAC Systems in the State Space References

Chapter 4 Extremal Control System of Turbo Prop Fan Engines.....

Chapter 5 Intelligent Control Systems of Aeroengines

Chapter 6 Multivariable Robust Control Systems of Aeroengines

Chapter 7 Fault Tolerant Digital Control Systems of Aeroengines

Chapter 8 Integrated Flight/Propulsion Control System

References

<<现代航空发动机多变量控制系>>

编辑推荐

《Advanced Multivariable Control Systems of Aeroengines》由北京航空航天大学出版社出版，In this book the methodology and concept of designing multivariable control systems for aeroengines are presented which include: general development tendencies in aeroengines and aeroengine control systems; modeling of aeroengines; design of various control laws for aeroengines; design of fault tolerant control systems for aeroengines and design of integrated flight/propulsion control systems. This book is useful to practicing engineers and designers of aeroengine control systems and aeroengines as a reference book and as an updated to their engineering education. This book should prove useful also for PhD and MSc candidates of disciplines of aeroengine control systems and aeroengines for their graduate courses.
