

<<荞麦研究进展>>

图书基本信息

书名：<<荞麦研究进展>>

13位ISBN编号：9787810923583

10位ISBN编号：7810923587

出版时间：2007-08-01

出版时间：西北农林科技

作者：柴岩

页数：580

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<荞麦研究进展>>

内容概要

《ADVANCES IN BUCKWHEAT RESEARCH》主要内容包括了：Keynote Presentation、Genetic Resources and Breeding、Molecular Biology and Biotechnology、Physiology and Cultivation、Quality and Post-harvest Processing、Nutrition and Pharmacy几部分。

书籍目录

Contents

Section A Keynote Presentation Perspectives of Breeding Buckwheat for High Quality I. Kreft, N.K. Chrungoo, N. Devadasan, et al. Production, Research and Academic Exchanges of China on Buckwheat Lin Rufa, Chai Yan

Natural Populations of the Wild Ancestor of Cultivated Common Buckwheat, *Fagopyrum Esculentum* ssp. *Ancestrale* from the Dongyi River Valley-Their Distribution and Allozyme Variations Ohmi Ohnishi

First Report of Male Sterility in Self-pollinating Buckwheat Yingjie Wang, Clayton G Campbell

Proteomic Approach to Seed Developing Proteins in Buckwheat Min-Hwa Park, Seung-Woo Cho, Ki-Na Yun, et al.

Section B Genetic Resources and Breeding Evaluation of Common Buckwheat Genetic Resources in Czech Gene Bank Dagmar JanovskJ, Zdenk Stehno, Petra epkovJ

Investigation and Study on the Geographical Distribution of Wild Buckwheat Resources in Sichuan Wang Anhu, Xia Mingzhong, Cai Guangze and Ren yinghong, et al.

Morphological Characteristics and Habitats of Three New Species of the *Fagopyrum* (Polygonaceae) in Panxi Area of Sichuan, China Liu Jianlin, Tang Yu, Xia Mingzhong, et al.

Varietal Differences among the Buckwheat Cultivars in Canada and Japan in the Long-day Condition before Flowering Followed by the Short-day Condition Hiroyasu MICHİYAMA, Masaki URUSHIBATA, Rie HOSONO, et al.

Evaluation of Common Buckwheat Varieties Registered in Czech Republic Dagmar JanovskJ, Petra epkovi

Genetic Relationship among Germplasm Resources of Buckwheat in Northwestern Sichuan Using RAPD and Isozyme Marker Yang Xiaoyan, Chen Hui, Shao Jirong, et al.

Assessment of Genetic Diversity of Tartary Buckwheat (*Fagopyrum Tataricum*) Collections in China Using AFLP Markers Zongwen Zhang, Lijuan Zhao, Ramanatha V. Rao

Genetic Diversity of Tartary Buckwheat (*Fagopyrum Tataricum* L. Gaerth) Landraces from Tibet Hu Yingang, Li Ruiguo, Zhang Yan, et al.

Factor and Cluster Analysis of Tartary Buckwheat Resources Li Ruiguo, Gao Dongli, Chai Yan, et al.

Analysis of Isoenzyme between the High Flavone Mutants of Tartary Buckwheat and the Primitive Breeds at Different Growth Stages Cao Honggang, Li Runping, Dong Yanhui, et al.

Warm-water Emasculation in Self-pollinating Buckwheat Yingjie Wang, Clayton G, Campbell

Use of the Third Species *Fagopyrum Homotropicum* in *E. Esculentum* x *F. Cymosum* Crossing Galina Suvorova

Genesis of Grain Yield in Buckwheat (*Fagopyrum Esculentum* Moench) with a Special Attention to the Low Seed Set V. Cawoy, B. Halbreccq, A.L. Jacquemart, S. Lutts et al.

Study of Interspecific Cross *E. Esculentum* Moench. ($2n=4x=32$) x *E. Homotropicum* Ohnishi ($2n=32$) and some Reflections about Different Views on Crop Evolution of Buckwheat Nikolay N. Fesenko, Ivan N. Fesenko

Some Results of Selection Work with Buckwheat in Primorsky Krai Ludmila Moiseenko, Alexey Klykov, Elena Barsukova, et al.

Responses of Common Buckwheat (*Fagopyrum Esculentum*) to Enhanced UV-B Radiation and Selenium Mateja Germ, Barbara Breznik

Morphological and Genetic Aspects of Buckwheat Interspecific Incompatibility Overcoming Taranenko L.K., Yatsishen O.L., Taranenko P.P.

Effect of Interruption of Pollination by Walking or Flying Insects on Seed-set in Buckwheat Hiroyasu Michiyama, Masanori Urushibata, Ikumo Otani

Brkeding of Determinant Buckwheat for Large Inflorescence as a Factor of Increase of Efficiency and Adaptability of Crop Martinenko G.E.

Hybridization between 'Rice' and Normal Tartary Buckwheat and Hull Features in the F₂ Segregates Yuji Mukasa, Tatsuro Suzuki and Yutaka Honda

Hexitability and Variation of Fertilization Rate in Common Buckwheat Shin-ya Kasajima, Naoto Inoue, Yasuyuki Ueda

Breeding of Variety 7-2 Charactered by High Content of Flavonoid, Thin Peel and Use for Making Mill Yao Ziqiang, Zhong Xinglian, Luo Chuchang, et al.

Characterization of Buckwheat Cultivars Using Morphological, Chemical, Physiological and Biochemical Parameters M. Naseem, M. Dutta, Shachi Shah, et al.

Irradiation Effect of ⁶⁰Co γ-rays on Tartarian Buckwheat Shen Huifang, Guo Feng, Li Guozhu

Research on Inherited Coefficient of Main Characters of Tartary Buckwheat's High Flavone's Mutant Wei Sisuo, Dong Lingling, Wei Sixian, et al.

Heredity Analysis of Flavone and Agronomic Characters among Radiated Tartary Buckwheat Mutants Li Guozhu, Shen Huifang, Fan Linhua, et al.

Section C Molecular Biology and Biotechnology Sequences Analysis and Internal Transcribed Spacer of *Fagopyrum Cymosum* and Its Systematic Utility Wu Qi, Zeng Zixian, Shao Jirong, et al.

Purification and Partial Properties of Recombinant Buckwheat Trypsin Inhibitor Li Chen, Zhao Fei, Tian Xin, et al.

Induce Apoptosis of Buckwheat Trypsin Inhibitor on Acute Myeloid Leukemia Cells Zhang

Zheng, Gao Li, Li Yuying, et al. Cloning and Sequence Analysis of Gene Fragment of Major Allergenic Protein in Tartary Buckwheat
 Zhang Xin, Zhao Xiaozhen, Jing Wei, et al. Proteome Approach as a Tool for the Efficient Separation of Seed Storage Proteins from Buckwheat
 Sun-Hee Woo, Min-Hwa Park, Seung-Woo Cho, et al. Fusion Expression and Analysis of the Epitope Regions in Tartary Buckwheat Allergen
 Cai Guihong, Bai Chongzhi, Li Yuying, et al. A Primary Exploration of a Novel Way for Developing Long Repeats SSR Markers of Tartary Buckwheat
 Yanqin Li, Quanbin Zhang, Tonglin Shi, et al. Simulation of Bioactive Effectiveness of Buckwheat Sprout Extract by DNA Chip Technology
 Ok-Soon Kim, Sung Jin Park
 A Proposed Model Dwarf Buckwheat Plant
 K-chibi Jotaro Aii, Mio Nagano, Kaom Yamamoto, et al. Section D Physiology and Cultivation
 Effects of Three Kinds of Plant Growth Regulators on the Growth and Development of Buckwheat in Dry Farmland
 Yao Mansheng, Fan Jianchun
 Allelopathic Effect of Buckwheat (*Fagopyrum Esculentum* Moench)
 Jana Kalinova
 Visualization of Internal Buckwheat Fruits Structure by the Three Dimensional Spectral Imaging System
 Kaori Fujita, Mizuki Tsuta, Junichi Sugiyama, et al. Influence of Air Temperature on Varietal Differences between Summer and Autumn Ecotype in Buckwheat
 Hiroyasu Michiyama, Kazunori Yoshimura, Tatsuya Hirano, et al. Differences between Singlet Oxygen and H₂O₂ Scavenging Activities among Various Organs of Common and Tartary Buckwheats
 Naoto Inoue, Seiko Hirakawa, Kaori Fujita, et al. Comparison of Selected Traits of Common and Tartary Buckwheat Originated from China and Czech Republic under Conditions of the Czech Republic
 Zdeněk Stehno, Dagmar Janovská, Zhuanhua Wang
 Comparison of Flower Development and Differentiation by *Fagopyrum Esculentum* and *Fagopyrum Tataricum*
 Chenghai Jin, Jung-Yun Kim, Cheol-Ho Park, et al. Plant Characteristics in Relation to Lodging in Self-Pollinating Buckwheat
 Hisayoshi Hayashi, Daisuke Toiguchi, Yingjie Wang, et al. Local Adaptability of Tartary Buckwheat in Korea
 Kwang Jin Chang, Jong In Park, Byoung Jae Park, et al. Study of the Effects on Different Fertilizer Allocated Proportion to the Growth Development and the Yield of Buckwheat
 Yao Mansheng, Zhang Weizhong
 Anatomy of Conductive System Tissues of Common Buckwheat Stalk
 Pavlova I. V., Dubovik E. I., Kadyrov R. M. Effect of Ecological Environment on Flavonoids Content of Tartary Buckwheat
 Feng Baili, Gao Dongli, Chai Yan, et al. Pessimistic Interrelatedness Analysis of the Buckwheat Seed Output and Related Factors
 Chang Keqin
 Modes of Increasing of Buckwheat Seeds Quality
 Glazova Z. I., Kirsanova E. V., Fesenko A. N. Quality and Development of Rice Producing Tartary Buckwheat
 Zhao Gang, Yang Jingdong, Zou Liang, et al. Improvement of Yield by Utilizing Slow-acting Fertilizer in Common Buckwheat
 Honda Y., Y. Mukasa, T. Suzuki
 Effect of Soil Arsenic on Yield and As and P Distribution Pattern among Plant Organs of Buckwheat and Castor Oil Plant
 Rezwanul Mahmud, Naoto Inoue, Shin-ya Kasajima, et al. High-yield Cultivation Technologies and Characteristics of Buckwheat New Variety-Dingyin No. 1 (KP9920)
 Liu Jieying, Ma Ning, Wang Fusheng
 Effects of Rare Earths on Plant Characters and Yield of Tartary Buckwheat
 Li Faliang, Cao Jixiang, Su Liping, et al. Influence of Yield Parameters on Protein in Buckwheat Achenes
 Jana Kalinova, Jan Moudry
 Effect of N Fertilization and Growth Regulator on Buckwheat Yield and Some Phenolic Compounds in Seeds
 Dietrych-Sz6stak D., Burda S., Podolska G. Superiority and Countermeasure of Buckwheat Industry Development in Ningxia
 Guo Bingcheng
 Response of Grain Yield, Yield Components and Allergic Protein Content of Buckwheat to Drought Stress
 Grazyna Podolska, Iwona Konopka, Jerzy Dziuba
 Effects of Planting Density and Fertilization on Yield and Rutin Content in Tartary Buckwheat
 Kwang Jin Chang, Jong In Park, Byoung Jae Park, et al. Labor-saving Cultivation Practice of Tartary Buckwheat in Korea
 Kwang Jin Chang, Jong In Park, Byoung Jae Park, et al. Effects of Sowing at Different Time on Flavonoids Content of Buckwheat
 Gao Jinfeng, An Shouqiang, Gao Xiaoli, et al. Performances and Stabilities of Yield of Tartary Buckwheat Varieties
 Gao Xiaoli, Gao Jinfeng, Feng Baili, et al. Variety and Location Influence on the Rutin Content of the Grain of Buckwheat (*Fagopyrum Esculentum* Moench. and *Fagopyrum Tataricum* Gaerm.) Grown in Central and Southern Italy
 Andrea Brunori, Gytrgy Vegvari
 Contract Cultivation in China
 chiro Inasawa, Feng Yue, Toshiyuki Inasawa
 Section E Quality and Post-harvest Processing
 Effect of Temperature and Light on Growth and Antioxidant Contents in Tartary Buckwheat Sprout Vegetables
 Young-Ho Yoon, Jun-Gu Lee, Sung-Kook Kim
 Determination of Albumin + Globulin Polymorphism in Buckwheat Accessions Preserved in Czech Gene Bank
 Petra Cepkovičová, Věclav Dvořák, Dagmar Janovská, et al. Variation in Seed Protein Subunits among Species of the Genus *Fagopyrum*

Mill Jianhui Li, Qingfu Chen Seed Protein Polymorphism of Common Buckwheat (*Fagopyrum Esculentum* Moench.) Varieties, Revealed by SDS-PAGE TN. Lazareva, N.E. Pavlovskaya, I.N. Fesenko, et al. Field Evaluation and Rutin Content of Five Tartary Buckwheat Under Conditions of the Czech Republic Dagmar Janovsk, Ivana. Paulifikov~Determination of Rutin Content in Tartary Buckwheat (*Fagopyrum Tataricum* (L.) Gaertn.) by Three Analytical Methods Eva Matejova, Svejiana Sykorova, Dagmar Janovska Study on Content of Amino Acid, Nutrition and Total Flavonoid of Tartary Buckwheat in Different Ecological Environment Li Faliang, Cao Jixiang, Su Liping, et al. Studies on the Best Technics of Embedding Flavonoid in Buckwheat Plant with 3-CD Wang Xiangdong, Guo Jingbo, Zhang Yan, et al. Measurement of Rutin and Quercetin in Tartary Buckwheat Flour by Ultraviolet-Induced Fluorescence Komori, Aiko, Naoto Inoue, Kaori Fujita, et al. Characterization of Common and Tartary Buckwheat for Palatability and Nutrition Kiyokazu Ikeda, Yuya Asami, Rie Arai, et al. Rutin Content of the Grain of Seven Buckwheat (*Fagopyrum Esculentum* Moench) Varieties from Belarus Grown in Central and Southern Italy Andrea Brunori, Gytrgy Vegvari, Roman Kadyrov Flavonoids Content of Buckwheat in Different Development Stage Chai Yan, Gao Dongli, Feng Baili, et al. Development of Oxidation Resisting Tartary Buckwheat Wine Yunlong Li, Shan Fang, Junsheng Bian, et al. Effects of Traditional Processing Methods on Nutrition and Functional Characteristics of Buckwheat Products Zhang Ei, Li Zhixi, Gong Fengqiu Effects of Total Flavonoids Extracted From Tartary Buckwheat Bran on Blood Fat and Antioxidation in Hypertensive Rats Min Wang, Yimin Wei, Jinming Gao Effects of the Oil Extracted From Tartary Buckwheat Bran on Blood Fat and Lipid Peroxidation in Hyperlipemia Rats Wang Min, Wei Yimin, Gao Jinming, et al. Response of Particular Phenolic Compounds Content of Buckwheat Nuts to Sowing Terms Dietrych-Sz6stak D., Burda S., Podolska G Hyperfine Milling Properties of Different Parts of Tartary Buckwheat Cheol Ho Park, Dong E-n Kim, Soon Kwan Hong, et al. Extruding Technology of Tartary Buckwheat Materials Wi Soo Kang, Dong E. un Kim, Soon Kwan Hong, et al. Fine Structure and Water Solubility of Tartary Buckwheat Materials Processed in Different Methods Dong Eun Kim, Wi Soo Kang, Soon Kwan Hong, et al. Determination of Rutin Content on Chinese Buckwheat Cultivars Yu Zhanyong, Li Xiulian Section F Nutrition and Pharmacy Preliminary Study on Nutritional Quality of Seeds of Five Buckwheat Species Tang Yu, Sun Junxiu, Peng Dechuan, et al. Preparation and Characterization of Polyclonal Antibodies Against Buckwheat Trypsin Inhibitor Li Yuying, Cui Xiaodong, Bai Chongzhi, et al. Nutrition-Educational Aspects of the Utilization of Buckwheat Sayoko Ikeda, Kazue Tomura, Yuko Yamahata, et al. Identification of Anthocyanins in Buckwheat Sprouts and Petals Tatsuro Suzuki, Shigenobu Takigawa, Hiroaki Yamauchi, et al. Extraction, Purification and Characterization of a New Allergenic Protein from Tartary Buckwheat Seeds Cui Xiaodong, LI Fang, LI Yuying, et al. Drastically Reduced Antigen-Antibody Interaction of Fag e 1 by the Controlled Maillard-type Glycosylation with Polysaccharides Soichiro Nakamura, Yasuhiro Suzuki, Eri Ishikawa, et al. Buckwheat and Other Food Allergy/Intolerance, Asthma, and Dietary Habits among Female University Students in Kobe and Kamakura, Japan Motoko Takaoka, Dan Norbck Buckwheat (*Fagopyrum Esculentum*) Allergenic Seed Proteins are Restricted to the Embryo and not Found in the Endosperm Marija Li~en, Ivan Kreft Health Effects from Increased Intake of Rutin from a New Type of Tartary Buckwheat Biscuits-an Experimental Cross-over Study Gunilla Wieslander, Nina Fabjan, Ivan Kreft, et al. Estrogenic Effects of Buckwheat Bioflavonoids on Ovariectomized Female Rats Cao Hongping, Fang Zhaoqin, Wang Xiaobo, et al. A Novel Technique for Translate Fagopyritols into D-Chiro Inositol Bian Junsheng, Li Hongmei, Hu Junjun, et al. Antioxidant Activity of Ethanol Extracts of Different Buckwheat He Yongyan, Feng Baili, Deng Tao, et al. Comparison of Flavonoids Content from Tartary Buckwheat Bran between Microwave-assisted Extraction (MAE) and Alcohol Extraction Zhou Xiaoli, Zhou Yiming, et al. Study on the Antioxidant Ability and Safety of Products from Transformation of Flavones of Buckwheat Shan Fang, Guixing Ren, Junsheng Bian, et al. Pharmacological and Pharmaceutical Developments on *Fagopyrum Tataricum* Yang Jingdong, Hu Yibin, Zou Liang, et al. Study of Extraction Method of Flavonoids from Radiated Tartary Buckwheat Mutants Li Guozhu, Wang Jianhong, Shen Huifang, et al. Synthesis of New Rutinoside by Rutin-degrading Enzymes from Tartary Buckwheat Seeds and Its Inhibitory Effect on Tyrosinase Activity Toshitaka, Yasuda Technological Research on Bioflavonoid Effervescent Tablet of Tartary Buckwheat Zou Liang, Yang Jingdong, Hu Yibin, et al. Antioxidant Activity of Seed Ethanol Extracts of Different Buckwheat
